

Sampson
Tarrytown, N.Y. November 2, 1903.

Mr. W. H. Mersereau,

Dear Sir:-

Your favor of the 30th. ult. received and contents noted. The tile man was here last week, and we had him re-set the tile around closet slab at Sunnyside. While we have not personally inspected it, have no doubt he put it in good order, as he had new tile for the work.

We will attend to the repairs on furnace in a day or two, - have been "snowed under" with orders the past few weeks, and have been wholly unable to obtain additional help. Every one in our line of business along the river, appears to be in the same situation.

In your order of Aug. 13th. for the new water closet, you included the new waste for bath tub in our estimate for the closet.

Now our figure was for the closet only, as stated, and the new waste for tub was included in estimate for the new bath room.

We ought to have brought this matter up at the time, but the writer was trying to get a little vacation just at that time (with poor success), so the matter was neglected. Thinking, however, that the new bath room would be put in, and the matter would in that way adjust itself, we let it rest for the time.

The new waste, and putting in, cost \$17.69, - (Dalton, Ingersoll did

Mr. W.H. Mercey,

Dear Sir:-

Your favor of the 30th ult. received and contents noted. The tile man was here last week, and we had him re-set the tile around closet sash at Sunnyside. While we have not personally inspected it, have no doubt he put it in good order, as he had new tile for the work.

We will attend to the repairs on furnace in a day or two, have been "snowed under" with orders the past few weeks, and have been wholly unable to obtain additional help. Every one in our line of business along the river, appears to be in the same situation.

In your order of Aug. 13th. for the new water closet, you included the new waste for bath tub in our estimate for the closet. Now our figure was for the closet only, as stated, and the new waste for tub was included in estimate for the new bath room. We ought to have brought this matter up at the time, but the writer was trying to get a little vacation just at that time (with poor success), so the matter was neglected. Thinking, however, that the new bath room would be put in, and the matter would in that way adjust itself, we let it rest for the time. The new waste, and putting in, cost \$15.00. (Dalton, Ingersoll did

not have a waste, after all, to take place of patent waste, without drilling hole in tub larger, - which we accomplished successfully)

If you think Mr. Irving would not be satisfied with the explanation, we shall have to let the matter go, - although the work has cost us more than we are getting for it. If the other bath room had been done, we should have got through with this part of the work, better, ~~since the tiler~~ would have been here to do that portion of the work.

Yours truly,

C. H. Curtis & Co.
