Mr. Wm. H. Mersereau,
32 Broadway,
New York, N. Y.

Dear Sir:-

Answering yours of the 14th. inst. would say
that I have been to Sunnyside three times while my work was going on, and
can assure you that everything has been left in a safe condition.

I have lined the flue with a pipe made of genuine
galvanized iron (not steel) which will positively last as long as the
building, as wood smoke does not contain anything injurious to iron, but
instead deposits a resinous substance which acts as a preservative.

I have ordered Mr. Richard Behrens to patch up
the places and leave them as they originally were.

Truly yours,

John Whitley

H. W. H.

*Please return
to W. H. W. for filing*

MR. W. H. MORTON

88 BROADWAY

New York, N. Y.

Dear Sir:-

Answering yours of the 14th. Inst. would say

can assure you that everything has been left in a safe condition.

I have lined the flue with a pipe made of gunnysack.

galvanized iron (not steel) which will positively last as long as the

building, as wood smoke does not contain anything injurious to health.

instead denotes a testious substance which acts as a preservative.

I have ordered Mr. Richard Bortone to return to

the places and leave them as they originally were.
