

Summary

C. H. CURTISS & CO.
HARDWARE,
PLUMBING & TINNING.

STEAM, HOT WATER AND HOT AIR HEATING.

Tarrytown, N.Y. Jan. 14, 1904.

Mr. Wm. H. Mersereau,

Dear Sir:-

We have received your favor of the 12th. inst with enclosure, and have also called at Mr. Irving's to look over the situation. Will send estimate for the proposed changes and additions, as soon as we can obtain present prices from Messrs. Dalton & Ingersoll. Where it is proposed to set the Roman bath tub, there are a four inch soil and two inch vent pipes on the south side that we think would prevent putting in a five foot tub, unless they were moved, -which can be done. Probably a 4'6" tub would go in, leaving the pipes as they are. We will give Messrs. Dalton & Ingersoll the sketch of the space, showing these pipes, and have them advise us, and get price of both sizes.

The writer spent some time with Stone, looking for the overflow drain from cistern and court, but did not find it. According to our recollection, it discharged on the bank, but apparently does not do so now. Mr. Irving put in a drain at the foot of the bank to take care of the leader drains, and we think this one must have been connected with it. We told the gardener, however, that when the snow was off the ground, and the weather conditions more favorable, we would assist him in locating the drain, if that would be satisfactory to Mr. Irving.

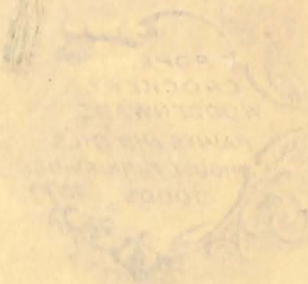

Yours truly, *C. H. Curtiss*

C. M. CURTIS & CO.

ALBANY, N. Y.

Mr. W. H. Harrison

Dear Sir:-

We have received your favor of the 12th inst.

with enclosure, and have also called at Mr. Irving's to look over the situation. Will send estimate for the proposed changes and additions as soon as we can obtain present prices from Messrs. Dalton & Ingersoll. Where it is proposed to set the Roman bath tub, there was a four inch soil and two inch vent pipes on the south

side that we think would prevent putting in a five foot tub, unless they were moved, which can be done. Probably a 4'6" tub would do in, leaving the pipes as they are. We will give Messrs. Dalton & Ingersoll the sketch of the space, showing these pipes, and have them advise us, and get price of both sizes.

The writer wants some time with Stone, looking for the overflow drain from kitchen and coat, but did not find it. According to our recollection, it discharged on the back, but apparently does not do so now. Mr. Irving put in a drain at the foot of the back to take care of the toilet drains, and we think this one must have been connected with it. We told the gardener, however, that as the snow is off the ground, and the weather conditions more favorable, we would suggest him in locating the drain, it would be better

Yours truly,
