## Yellow Flowers Make a Cheerful, Lovely Border

Combine Them With Blues For A Delicate Color Scheme; Here's A Long List To Choose From.

Yellow is a cheerful color, and is a favorite with many amateur growers. A yellow border with some blue plantings to go with the pale yellows scarlets and clear reds for the brilliant yellows, and a little lavender for the orange yellows, gives a strip of brilliance and beauty.

Among flowers, the annuals furnish a fine list of yellows of various textures, tones and intensities. The dwarf sunflowers are good for the tall portion of the border. They are dwarf only as compared with their tall varieties, which may grow from 8 to 10 feet. The dwarfs reach only 3 feet and have delicate flowers and foliage compared with the old-fashioned barnyard sunflower. They are known as the cucumber-leaved strain, cucumerifolius, in the catalogs, and range from creamy white to intense yellows with black centers, and the latest development gives a strain with red zonings.

They are easily raised annuals and fine for cutting, the petals being long and often gracefully twisted.

Along with the sunflowers for tall yellows is the hennemannia or bush California poppy.

The calliopsis, annual coreopsis, with golden flowers zoned with crimson is indispensable in the yellow borders, and the marigolds, both tall and dwarf with their cousins, the favorite calendula or pot marigold, will furnish beautiful cutting material. The California poppies furnish low growing brilliant masses of yellow.

The annual chrysanthemums give

TYPES OF SMALL FLOWERED ANNUAL SUNFLOWERS FOR THE YELLOW BORDER

softer yellows. In a burnt orange of glistening texture unknown in other annuals are the African daisies, dimorphotheca. There are other shades from white to creamy yellow as well as brilliant oranges, all excellent for cutting.

The annual blanket flowers, or gailardias, will furnish the touch of red along with yellow needed for the border, and they too are fine cutting material.

### BOURBON HORSE FARM SOLD TO OHIO BUYER

Judge John T. Ireland, well-known thoroughbred breeder and racing official, closed a deal here Wednesday, whereby he and his sister, Mrs. Mary Ireland Davis, transferred their 300-acre farm on the Georgetown road to Mr. Roy G. Martin, of Toledo, Ohio. The price was not given out for publication.

Included in the transfer were the machinery and equipment and the livestock composed mostly of sheep and brood mares and foals. The tract is a well-equipped race horse breeding establishment, having been brought to its present improved state under the direction of Mr. Ireland.

Forrest Myneer, for the past 16 years manager for Mr. Ireland, will continue in the same capacity for Mr. Martin.—Bourbon News.

TO CHEWERS OF TOBACCO

Strange as it may seem, the disgusting habit of masticating "the weed" (tobacco) is more seductive, more tenacious in its hold on the chewer, and, in some ways, less harmful to him than the more elegant habit of smoking, to which society is more tolerant.

In this article I shall try to illustrate, not the effects of the nicotine but the perversion of human saliva from its normal function—more deleterious than the tobacco alkaloid involved. This is the chief trouble from chewing tobacco.

The saliva is a natural fluid, secreted by the glands for a definite purpose—to balance the acid gastric juice. The chewer wastes it by his successive expectorations. If he chews before breakfast, so much the worse—he is sure of excess acid for the digestion of this highly important meal. Prolonged state of this normally alkaline saliva being thrown away, causes the victim, to become dyspeptic with a chronically acid stomach. Sourness, gas eructations, inability to digest fatty foods, and even burning pain are evidences of this trouble. It is not the nicotine, but the lost saliva that produces the condition; chewing any other thing and spitting out the saliva would doubtless cause much the same trouble.

The victim seldom lays his trouble to the tobacco. Excess of acids will in time corrode the wall of the stomach and produce ulcers. A patient of mine once relieved all his stomach distress by stopping short on the chew within the hour before and after meals. I once saw a man of 101 years, who had chewed "ever since he could recollect" but never chewed before breakfast, nor to excess at any other time.

Of course the better way is never to chew tobacco nor anything else but good wholesome food in moderation, but the aged brother who chews must be borne with in charity.

### KENTUCKY STARTED "GO TO SUNDAY SCHOOL" MOVEMENT

Kentucky was the first state to have a state-wide Go-To-Sunday-School Day. This was May 3, 1914. The attendance at the Sunday schools of Kentucky that day was about double the number who regularly attended. Many who came that day became regular members of the Sunday school.

Governor James B. McCreary, who was governor of Kentucky in 1914, was the first governor to issue a proclamation inviting all citizens of the state to attend Sunday school. His example was followed by the governors of many of the states in the years following 1914.

President Woodrow Wilson sent a message commending the service being rendered by the Sunday school teachers of Kentucky, saying: "The Sunday school lesson of today becomes the code of morals of tomorrow. The study of the Bible makes better American citizens."

With eighteen candidates for governor in Florida, hotel headquarters ought to use up most of the space made available by the exodus of tourists.

## Repairs are more Costly than Paint

Don't neglect your property any longer. Kurfees 80% Lead and 20% Zinc Paint will cover your property with a protecting film that is weatherproof, hides the surface, seals the pores, keeps out dampness and as it slowly wears away, leaves the surface in fine shape for repainting.

So-called cheap paints, on the other hand, contain such cheap materials as clay, chalk, adulterated oils and water. These paints crack, peel, blister and flake off and leave the surface in bad condition for repainting. They do not protect your property.

Before you buy paint check the formula—that's the safe way. Watch for water and other cheap stuff.

Be safe and save your money—paint your house to stay painted with Kurfees 80 and 20.
