

Hauptmann Pays For His Crime

Convicted Kidnap-Murderer Of Lindbergh Baby Executed Friday Night.

Bruno Richard Hauptmann was executed in the electric chair in the New Jersey state prison Friday night, April 3, 1936, for the kidnap-murder of the Lindbergh baby—the crime which he refused to the end to admit.

He was pronounced dead at 7:47½ p.m., Harrodsburg time, after three violent charges of electricity had surged through his body.

Hauptmann's execution came after a series of postponements brought about by various twists of legal strings. He was to have been put to death last Tuesday night and the pardon board had refused clemency but at the last minute Warden Kimberling allowed the condemned man 72 hours more to live. His action, grew out of the request of the Mercer (Jersey) county grand jury which was investigating a "confession" of the crime made by Paul H. Wendel, disbarred attorney.

Pale and silent, Hauptmann walked to his death with the same quick step characteristic of his gait while on trial for the crime. He said nothing but sat calmly in the chair while the guards adjusted the straps. Fifty-five witnesses crowded the death chamber to witness the execution.

Hauptmann's Life In Brief

Milestones in the life of Bruno Richard Hauptmann are listed as follows by International News Service:

- Born Nov. 26 1899.
- 1913 Started to work at 14 as carpenter's apprentice.
- December, 1918—Discharged from German army.
- March 16, 1919—Arrested for burglarizing burgomaster's house.
- 1923 Arrived in New York as stowaway.
- October 10, 1925—Married Anna Schaffler, a domestic.
- March 1, 1932—Charles Augustus Lindbergh, Jr., kidnaped.
- April 2, 1932—\$50,000 ransom paid by Dr. John F. Condon to man whom he identified as Hauptmann.
- May 12, 1932—Baby Lindbergh found dead.
- Sept. 19, 1934—Hauptmann arrested for kidnap-murder.
- January 2, 1935—Sentenced to die in electric chair but received postponement.
- March 31, 1936—Scheduled to die in electric chair but received postponement until April 3.
- April 3 1936—Reprieve for execution drawn up but not used. Haupt-

mann dies in the electric chair in New Jersey state prison.

HAUPTMANN'S SPIRITUAL ADVISER IS UNFROCKED

The Rev. D. G. Werner, spiritual adviser to Bruno Richard Hauptmann, has been unfrocked by the Greater New York Conference of the Seventh-Day Adventists. It was learned yesterday. No reason was given but it is understood that Mr. Werner's actions in the Hauptmann case caused the move.

WRITES WHAT HE THINKS

The Stanford Interior Journal has one correspondent that evidently doesn't have any scruples against writing what he (or she) thinks in reporting the news of the community. The Middleburg news in last Friday's I. J. carried the following plain-spoken paragraph:

"It was reported Saturday that Otto Wilhoit, colored, had shot his brother, Virgil Wilhoit, but the people generally seem to care so little about it that we could get little, if any, facts. They live on Hatter road, a mile south of Yosemite, and Otto is thought to be about as worthless a creature as you would want to meet up with. Besides, he is considered the boss chicken thief in the county, and Virgil is a feeble-minded creature, but considered harmless."

Another item in this same column read as follows:

"Report comes from Walltown that one of the farmers of that section, in order to protect his chickens from rogues which infest the neighborhood, placed a loaded shotgun in his chicken house. Strange as it may seem the gun fired just as one of his neighbors happened to be passing near. Wasn't that remarkable?"

KENTUCKY SADDLE HORSE GROUP ELECTS OFFICERS

Claude M. Thomas, Paris, who has served for 19 years as president of the American Saddle Horse Breeders' Association, was re-elected Tuesday at the annual meeting of stockholders in Louisville. All other officers and directors also were re-elected.

They are: A. G. Jones, North Middletown, first vice president; T. M. Wilson, Bowling Green, second vice president; C. J. Cronan, Jr., Louisville, secretary; William B. Belknap, Goshen, Ind. Directors included Arthur Black, Boston; H. S. Caywood, North Middletown; R. B. Minton, Barboursville; L. N. Neale, Danville; Miss Clara S. Peck, New York; R. E. Moreland and Earl F. Shropshire, Lexington; H. T. Treadway, High Ridge, Mo.; Chenault Woodford, Mt. Sterling, and L. R. Thurman, Springfield.

Sea Snakes Common

Snakes in the sea are not uncommon in the tropics.

FLORIDA PROSPERS

ONE of the principal reasons why Florida prospers today is because you can buy in cans grapefruit juice and grapefruit which has sunned and ripened in leisurely fashion in well-cared for Florida orchards. And whether you serve it plain as a breakfast course or in one of the many delicious luncheon or dinner dishes made with this fruit, you'll recognize at once that it's good old Florida grapefruit. That's fame.

Try These Recipes

Citrus Cup. Cut apricots from a No. 2 can in halves and add the grapefruit from one No. 2 can, leaving it in large pieces. Divide into glasses. Mix the juice of one lemon with the grapefruit and apricot juices and pour over. Chill very well. Sprinkle liberally with finely-minced mint and serve. This serves eight persons.

Cranberry and Grapefruit Ice. Soften four teaspoons gelatin in four tablespoons cold water. Mash the cranberry sauce from a 1-pound 1-ounce can add two cups water and heat until melted. Add one-half cup sugar and boil for two or three minutes. Dissolve the gelatin in the hot liquid, cool, and add the contents of one No. 2 can of grapefruit juice. Freeze in refrigerator trays, stirring often. This serves eight persons.

Cherry and Grapefruit Salad. Mash three packages of cream cheese with enough cream to make soft. Make a holly ring or circle of cheese in the center of each lettuce-garnished salad plate. Drain a No. 2 can of pitted red cherries, and using half of the cherries, pile them inside the cheese rings. Drain one No. 2 can of grapefruit and arrange three or four sections around the outside of each cheese ring. Serve with French dressing. Serves eight.

Originated Rayon Thread

It was because silkworm diseases threatened Europe's silk trade, back in 1876, that a French scientist originated the popular rayon thread.

King's Highway of Cape Cod

The 90-mile long King's highway of Cape Cod extends from Plymouth to Provincetown, Mass.

DATA ON "FIRST AMERICANS"

Scientists are very much interested in excavations in a crescent-shaped ancient burial mound, discovered by Dr. Don F. Dickson in 1927 a few miles from Lewistown, Ill., which indicate that eventually there will be found 1,000 to 2,000 skeletons of men, women and children of a race at present unidentifiable.

Apparently unable to classify the remains with those of various other ancient races found in the Mississippi Valley, the Field Museum has listed the discovery as the "Dickson Culture," naming it, as usual, after the discoverer.

A museum housing the more than 200 skeletons already excavated, together with relics bearing indications of Axtex influence, has been erected at the site of the excavations, and archaeologists, anthropologists, geologists and other scientists as well as laymen from all parts of the world have visited the spot in the past nine years.

The excavations, thus far have reached only one-tenth of the total area of the mound. It is expected that somewhere in the mound or nearby the "chief of the tribe" will be unearthed, and that an unusual wealth of artifacts will be uncovered near his remains, which will guide scientists more clearly in determining the period and the race to be identified by the burial mound.

The Mississippi Valley is a fruitful field for such excavations, and will be for many years to come. Excavations are still going on at Wickliffe, in the western part of Kentucky, where already more than 150 burials have been uncovered and an ancient city of pre-historic people has been found.

JAMES L. COGAR HOME FROM TRIP TO EUROPE

The following from the Woodford Sun is of interest here where Mr. Cogar is well known:

James L. Cogar, who has been in England since January on a special mission for the Williamsburg (Va.) Restoration Corporation, is due to land at Norfolk on his return trip today.

Mr. Cogar carried letters to prominent people in London and other places in England and was accorded many social courtesies. He was entertained at dinner by Lady Astor (formerly Miss Langhorne, of Virginia). The London Daily Mail recently printed a story of Mr. Cogar's work in England for the Williamsburg Corporation.

Mr. Cogar is the elder son of Mr. and Mrs. W. B. Cogar.

Rare Animal

The aye-aye is a little animal about the size of a cat, with rodent-like teeth, is nocturnal in its habits, and found only in Madagascar.

Camels Fast

The thoroughbred Arabian racing camel, or dromedary, covers as much as 100 miles a day.

School Papers Now Graded By Machine

Professor at Eastern College Receives Patent on Unique Device To Save Drudgery of Teachers.

Dr. Noel B. Cuff, professor of psychology at Eastern Kentucky Teachers College, Richmond, has received notice from the United States Patent Office that his testometer, a device for grading student examination papers by weighing results, has been granted a patent.

Dr. Cuff perfected the testometer after several years experimental work and it is now used by several instructors at Eastern for grading student examinations.

The invention uses a perforated test card over which a thin paper sheet has previously been punched by the student in taking the test, is placed in such a manner that weights suspended above the perforations fall through the perforations where correct answers are given onto a scale below where the results of the test is determined by reading from the scale.

The apparatus is novel in construction and eliminates the drudgery and errors in counting answers as is now done in educational institutions. While it is extremely simple in construction, it is reliable and efficient, enabling the instructor to obtain correct student grades at a

glance and the device is said to be inexpensive.

Dr. Cuff has had several offers from firms interested in manufacturing the testometer but has not yet decided what plan he will adopt for the distribution of the device.

130 HEIRS SUE TO SELL BUILDING IN DANVILLE

Approximately 130 plaintiffs, most of whom are descendants of the Cox lineage and the International Sunday School Association of America, have filed a petition against the defendants, Henry Webster, Nancy Webster and the Citizens National Bank, of Danville, for the public sale of the three-story business building between the Welsh-Wiseman Company and the Chestnut-Salter Hardware Company.

The object of the suit is to sell the structure and make a division of the proceeds among the defendants. The Sunday School Association came into part possession of it through the will of J. Shreve Durham, who formerly owned a half interest which he devised to the Association.

KURFEES PAINT

One hundred per cent pure. Sold by Lee Smock Co.

ATTENTION

2 FOR 1 SALE

Beginning next FRIDAY, APRIL 17th we will put on a 2 for 1 sale of the famous Nyal lines. This means every item you buy will give you the same value in any item you want. It is not a 1c sale, strictly 2 for 1 or \$1.00 worth for 50c—Watch Ad Next Friday!

CORNER DRUG

GENERAL ELECTRIC REFRIGERATOR

"Looks like everybody's buying a General Electric Refrigerator!"

EVERY minute of every day somebody buys a General Electric Refrigerator. It will prove a thrifty investment in your home, too—for a G-E's savings will go on month after month, year after year. A G-E actually costs so much less to own, and can be so easily paid for out of its own savings, that every home can afford this finest of all refrigerators.

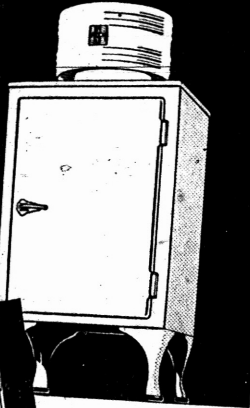

Famous General Electric Sealed-In-Steel Mechanism Now Gives "Double the Cold" and Uses LESS CURRENT Than Ever

The General Electric sealed-in-steel mechanism has been proved by experience. It is champion of billions of hours of unparalleled performance at low cost—in every type of home—and now it is even thrifter than ever.

See the NEW 1936 G-E MODELS They have every practical convenience feature.
