Gentlemen:-

We are enclosing herewith booklet entitled "When the Seat of the Road Wears Out". This book will give you valuable information in regard to the material for road repairing and machine for the mixing.

The JAEGER is the only machine we know of that is successful on this work. It is essentially suitable for this purpose on account of having a tilting drum which allows it to completely and quickly discharge the batch.

JAEGER mixers are used extensively by the State Highway Departments of Ohio, New York, Pennsylvania, and other states. In Kentucky they are used by the State Highway Department, City of Louisville, Jefferson, Bourbon, Shelby and a large number of other Counties.

The mixers which we sell for cold patch work can also be used for mixing concrete, mortar, plaster and similar substances.

We carry JAEGER mixers in stock at Louisville, also "Caterpillar" Tractors, Baker Maney 4-Wheel Scrapers, graders, portable gasoline engine driven air compressors, with jack hammer drills, tripod drills, road pumps, hoists, and in fact anything required in the way of road building or construction equipment.

If you desire quotations on anything in this line, we will be pleased to submit you a proposition. Trusting to have the pleasure of hearing from you, we are

Very truly yours,

RCW-K

ROY C. WHAYNE SUPPLY CO.

P. S. We expect to have a large exhibit at the convention of Road Engineers to be held in Louisville at the Jefferson County Armory June 7 to 10 inclusive.
