- 37- How far did Robinson get towards the front of that car, Ans- I imagine his front wheel got about even with the back wheels of the Springate car.

- Ans When he kept coming straight towards us all the time.
- 39- Did he gain on the other car ?
- Ans No.
- 40- When he came around the back part of the Springate car, how far was he from him?

- 41- He was driving by the side of the other car all that distance until he got up to you.
- Ans Not exactly - he never got to the side of the other car.
