

Hurling Sensation
CLEVELAND . . . 17-year-old Bob Feller, Iowa farm boy, is the newest baseball pitching sensation in the American League. In his major league debut he struck out 15 Stioeey Browns, allowed only 6 hits and one run to win for Cleveland. He stands 6 feet and weighs 175 pounds. "The speediest since Walt Johnson," say experts.

Silk Worm Cocoons Used
In the silk industry, even the rough coating on cocoons is salvaged and worked into low grade yarn.

Mileage in Shaving
From his first shave to his last the average man shaves over twenty square miles of face.

First State Roads
The congressional enabling act of 1816 accepting Indiana as a state paved the way for establishment of the first state roads. One provision of the act said that 5 per cent of the net proceeds of the sale of lands within the state by congress should be reserved for the building of public roads and canals, although the state was to receive only three-fifths of the amount, with the rest to be used in building roads from the eastern seaboard to the new state. This "3 per cent fund" netted the state \$575,547.75 from 1821 to 1867—truly a negligible sum as compared with highway expenditures of later times.

Early Use of Ether
Ether, the volatile liquid produced by the interaction of alcohol and sulphuric acid, was first prepared by an alchemist, Valerius Cordus, in 1540. The awakening interest in organic chemistry in the early Nineteenth century focused the attention of a number of investigators upon it, and the observation was made that it possessed a more violent intoxicating effect than alcohol.

Pueblo of Los Angeles
The pueblo of Los Angeles at the opening of the Nineteenth century consisted of a group of about 30 adobe-walled houses and the population of the settlement was about 400 white persons. Twelve of the houses fringed the old Plaza while the others were scattered nearby. Close at hand also was the Indian village of Yang Na.

Five Wars Began in Spring
Five of America's big wars began in the pleasant spring month of April.

Taj Mahal Regarded as World's Handsomest Tomb

Dated history of India begins about 600 B. C., but little was known of that country by Europeans until Alexander the Great's invasion in 326 B. C., says the Detroit News. The Mohammedans conquered most of the country during the Twelfth century and this was succeeded by a great Mongolian invasion. The Mogul dynasty was established in the Sixteenth century, ruling India for about 200 years. French and British trade rivalry by the middle of the Eighteenth century led to the ascendancy of the British East India company, under Clive and Hastings. The Indian mutiny of 1857 led to the transfer of the country from that company to the English crown. In 1877 Queen Victoria was proclaimed Empress of India.

The Taj Mahal near Agra, India, considered by some to be the most beautiful building ever constructed, was built by the Shah Jehan as a tomb for his favorite wife, Mumtaz-i-Mahal. It is of white marble, octagonal, and has an exquisite dome. Its construction required the labors of 20,000 men during a period of 21 years, from 1632 to 1653. Its architect was Ustad-Isa.

Belgian Horse Believed Oldest of Pure Breeds

With the exception of Merino sheep, the Belgian horse probably can claim to be the oldest pure breed in the world, says the Montreal Herald. Records show that draft horses have been bred pure in the Flemish lowlands of Northern Europe since 770 A. D. While they have not always been as heavy as they are today, the Flemish horses have served to carry knights in armor, pull chariots of war, and take part in flat races, as well as cultivate and harvest crops. It is even recorded that some Belgians have been noted for their speed and endurance, and some speeds recorded 100 years ago or more are very creditable.

Of the three well-known British draft breeds, the Clydesdale, the Shire and the Suffolk, the first two owe much to occasional infusions of blood of the Flemish horse during recent centuries. As long ago as the Fifteenth century the Flemish horse had its well muscled, close-knit body, but its legs at that time were presumably much finer than they are today.

"Feather in Your Cap"

The phrase, "feather in your cap," means that something is an honor to you. The allusion is to the very general custom in Asia and among the American Indians of adding a feather to the headgear for every enemy slain. The ancient Lycians, and many others had a similar custom, and it is still usual for the English sportsman who kills the first woodcock to pick out a feather and stick it in his cap. The custom is one form or another seems to be almost universal. In Hungary at one time none might wear a feather but he who had slain a Turk, and it will be remembered that when Gordon quelled the Taping rebellion he was honored by the Chinese government with the "yellow jacket and peacock's feather."

Law of Life That Enriches

It is a law of life that what we give unselfishly multiplies and returns to us. In helping others we enrich ourselves in the real things—the things that endure. We develop character—we grow in power and usefulness—we become real men and women, not dwarfs. The moment you fling open the door of your heart, and let your sympathy and helpfulness flow out to shed their fragrance and beauty upon lives that are starving for human fellowship, you begin to develop power. The moment you bottle them up you begin to strangle the best things in you, then you begin to dwarf your power and possibilities. Give and grow!

Nova Scotia Scottish

Nova Scotia, the land of Longfellow's "Evangeline" and popularly believed because of that poem to be largely French and English, is primarily Scottish, according to a correspondent. The opening of Nova Scotia's parliament is accompanied by the skirl of bagpipes, and several newspapers are printed partly in Gaelic. In the Nova Scotian county of Inverness, 72 per cent of the inhabitants speak Gaelic, while less than half in the similarly named county in Scotland can speak that ancient tongue.

Work of Storage Battery

Storage batteries, as the name indicates, supply electric power which has previously been supplied to the batteries when charged. In charging, electric current has produced a chemical change on the lead plates, so that it is chemical energy which is stored up. When the proper electrical connections are made, this chemical energy is transformed into electrical energy. When the storage battery is run down, it has no more chemical energy to transform until it has been recharged.

Windmills in Holland

The windmills in Holland were originally (and that is centuries ago) erected to pump the water from the numerous polders into the surrounding canals and thence to the sea. They were and are used for paper making, the grinding of cereals, spices, and rice, the sawing of lumber, etc., and they also drive dynamos for the generating of electricity in districts where the civil service supply of current does not penetrate.

The Green Frog

Much like the bullfrog in appearance and habits is the green frog, though the head and shoulders of this species are a brighter green, the webs of its feet are smaller and it is possessed of lateral folds of skin on the body which the bullfrog does not have. It is found about most of our small streams, ponds and cold springs, but not so abundantly as is the bullfrog. Its croak, says a writer in the Detroit News, has been aptly described by a well-known authority on frogs as an "explosive, prolonged, low-pitched sound, which may be repeated several times in succession."

Maturity of Fur Seals

Fur seals are remarkable in that the bulls do not reach maturity until they are six or seven years old, whereas the cows give birth to their first pup when only three years of age after a period of gestation of over eleven months. The bulls at maturity average upward of 500 pounds each in weight, while the mature females average only about 75 pounds. Experimental marking has shown that bulls attain a maximum age of about fifteen years and cows about twenty years.

Indians Like to Barter

With the Indians of Mexico bargaining is a custom and a sport and they are unhappy if the customer will not bargain. They begin bargaining with the statement, "This is the asking price; you offer."

Appian Way Built 312 B. C.

The Appian Way was built about 312 B. C. by Appius Claudius Caecus. This paved road ran from Rome south through Capua to Brindisi.

SCHOOL DAYS

Are here again, Mothers and Fathers. Let us keep your boy and your girl at the head of the class in looks.

YOU'RE NEXT

At our shop. We have six chairs, and six tonsorial experts. Give us a trial.

Curious Twin Lakes

High on a mountaintop on the island of Flores in the Flores sea is a curious set of twin lakes, says Collier's Weekly. Although separated from each other by only a thin wall of rock, one is colored turquoise-blue while the other is ruby-red. Stranger still is the fact that the water in both lakes has the general appearance and the complete opacity of paint.

Cause of Civil War

The issue of slavery was the direct cause of the Civil war. The question of states' rights or the right of a state to secede from the federation was the fundamental cause. This had been a vexed question from the beginnings of the government, until it was brought to a head by the slavery issue.

Commissioner's Sale.

MERCER CIRCUIT COURT
A. J. McCrystal's Admr. Pl'ff.
vs.
Oliver McCrystal &c. Def't.

Pursuant to the judgment rendered herein at the May Term, 1936, I will sell at Public Auction, before the Court House door in Harrodsburg, Kentucky, at 2 o'clock p. m. or thereabout on

Monday, October 5, 1936

it being the first day of Mercer Circuit Court Term, the property mentioned in the pleadings of said cause, being:

A tract of land in Mercer county, Kentucky, bounded as follows: Beginning at a stone in the Harrodsburg and Dixville turnpike corner to R. W. Kirkland; thence East 26 rods and 21 feet to a stone corner to Maty Logue; thence North 16 rods to the middle of the said pike; thence 23 rods with the middle of the pike to the beginning and containing 2 1/2 acres more or less. Being the same property conveyed to the said A. J. McCrystal by Charles Claunch and wife on 3rd day of July, 1920 the deed to which is recorded in D. B. 97 P. 627 Clerk's Office Mercer County, Ky.

Said property will be sold on a credit of 6 months; the purchaser will be required to give bond with approved security for the price, having the force and effect of a replevin bond payable to Ruth M. Strader, bearing six per cent interest from date and reserving a lien upon the property until the purchase money is all paid.

RUTH M. STRADER, Master Commissioner.
September 15th, 1936.

N. B. The purchaser will be required to execute bond forthwith, upon which execution may be issued if not paid at maturity.

Commissioner's Sale
MERCER CIRCUIT COURT

Chas. A. Hardin, et al. Pl'ff.
vs.
Geo. D. Divine, et al. Def't.

Pursuant to the judgment rendered herein at the January Term, 1935, I will sell at Public Auction, before the Court House door in Harrodsburg, Kentucky, at 2 o'clock p. m. or thereabout, on

Monday, October 5, 1936

it being the first day of Mercer County Court Term, the property mentioned in the pleadings of said cause, being:

A certain tract of land in Mercer County, Kentucky, on the Handy turnpike beginning in the center of the turnpike at the toll gate lot thence S. 3 1/2 degrees W. 25.2 chains to a stone corner to J. Hellen, thence N. 84 1/2 degrees W. 4.8 chains to a stone corner to same, thence S. 86 1/2 degrees E. 6.65 chains to corner to same, thence S. 3 1/2 degrees W. 6 chains, thence S. 11 1/4 W. 3.1 chains to Irvin Moore's heirs corner, thence N. 89 1/2 degrees E. 13.5 chains, thence N. 3 1/2 E. 57.25 chains to the center of the Handy turnpike; thence with the center of same S. 87 1/2 degrees W. 13.65 chains to the beginning, containing 95 acres, 2 rods and 53 poles.

The property will be sold as a whole, being adjudged by the court to be indivisible. Purpose of sale to raise debt of plaintiff, \$1100.00 with interest from Jan. 30, 1933, and \$155.00 estimated cost mentioned in the judgment.

Said property will be sold on a credit of 6 & 12 months; the purchaser will be required to give bond with approved security for the price, having the force and effect of a replevin bond payable to me bearing six per cent interest from date, and reserving a lien upon the property, until the purchase money is all paid.

RUTH M. STRADER, Master Commissioner.

QUESTION!

What is this nice investment property worth? Come to the Court House Door in Harrodsburg, Ky., and help to make the answer, on

Saturday, October 3rd, 1936

AT 1:30 P. M.

In order to make division among the heirs of James C. Wilson, I will at that time sell for cash:

- (1) A lot with double house West side Warwick street, second from corner of Lexington, fronting about 50 feet on the street.
- (2) A lot with double house, West side Warwick street, second from new bridge, fronting about 55 feet on street.
- (3) A house and lot south side of Water street, near said bridge, just East of Stoll Oil Filling Station, fronting about 20 feet on street.

The first and second lots have rented for years at \$4.00 per week each and the third at \$1.50 per week. The taxes and insurance on the first and second lots will not exceed \$25.00 each, while on the third it will be less than \$10.00.

Take pencil and paper and see what a handsome return this property is making. See how much it will pay 10% on all above taxes and insurance. Then compare with other investments at current interest of three to five per cent and bid on it accordingly.

C. E. RANKIN
Attorney for Jas. C. Wilson heirs.
W. P. Hatchett, Auctioneer.
