WARRANTY

Every piano sold by us of whatever make, is warranted by the manufacturer thereof for a period of at least five years, against defects in both workmanship and material, and should our customers have occasion to claim the benefits of a warranty, their protection will be found in the above mentioned warranty which each piano bears on the inside surface of its top, easily accessible, or is furnished separately by the manufacturer covering each piano sold.

DESCRIPTION OF PIANOS FURNISHED UNDER THIS ORDER

These pianos are 4 ft. 8 in. high; 5 ft. 2 in. long, and weigh boxed for shipping over 800 pounds. They are built with the best materials and by the best workmen that the country can produce. There is a certain element of construction in these pianos that make them distinctive—an elastic, responsive and agreeable touch, the maximum of duration of tone, deep responsive power, a scientific evenness and perfection of scale—which sustains an even singing and carrying quality throughout the whole instrument. The back of the piano, which is the most substantial part of the piano, is built with six posts $3\frac{1}{2}$ in. wide and 4 in. deep. The wrestplank is covered with three-ply of cross band, $\frac{1}{4}$ in. proper veneer so that the piano will stay in tune. The plate or scale is a full iron plate, gilded from top to bottom, and the bass strings copperized. The cases are made in mahogany, walnut, cherry, ebony or oak finish, with double cross band veneer inside and outside, so as to prevent any warping or splitting. The action is a first-class repeating action with muffler rail attached on the same. Three pedals of the latest design. The carvings on the case are hand-made, and the trusses are of a beautiful design. The tone of the piano is very powerful and even. The hammers are of the best imported felt. Taken as a whole, it is a first-class instrument in every respect. We can supply these instruments in several different designs and makes.
