BANKERS WILL MEET IN ANNUAL COUNCIL

Business Men Also Invited to Present Their Views on Services of Banks to the Public

WASHINGTON, D. C.—Robert V. Fleming, President American Bankers Association, has announced that the organization's annual convention will be held at San Francisco, September 21-24, and its program will fall in not only bankers but speakers from various lines of business to present their viewpoints and advice.

The plans for the convention discussions take into consideration the fact, he said, that one of the major problems of banking today is to develop its operations along lines that will create greater public understanding of its methods and services. "It is my earnest conviction that such public understanding of banking is not only an essential defense against attacks from whatever source, but is also requisite to reestablishing it upon a firm and satisfactory basis of profitable operations," Mr. Fleming said.

General Improvement Cited

"The improvement in general conditions which is now taking place should be of material aid to bankers in carrying forward a constructive program for increasingly useful relationships between banking and business, as well as one of more helpful personal business services to all our people. Sound banking conducted in ways the public understands and must be the aim of successful bank management."

"How can the banker make his operations and policies more understandable to the people of his community? How can better and broader financial services be soundly provided? How can banking improve its operating methods and income? These and many similar questions demand the earnest attention of all bankers. They call for a fresh counselling-together and a new interchange of experience and advice among the members of our profession."

"With these thoughts in mind, we have built the convention program with the view of also calling into our councils speakers from various lines of business to give us their viewpoints and advice. I can say without reservation that this is to my mind one of the most crucial years in the evolution of American banking, and that we are passing through a period demanding, as never before, cooperation and mutual exchange of viewpoint among our members and others."

Radio Commencement Exercises

More than 200 widely separated chapters of the American Institute of Banking, the educational section of the American Bankers Association, hold annually in September a simultaneous commencement exercise at which they listen to the speaker of the evening by radio. This is said to be the most extensive graduation ceremony held by any educational institution. The aggregate membership of the chapters, which are located in cities and towns throughout the United States, totals about 35,000 bank employees and officers. The graduates number each year more than 2,500, and total graduates are now over 25,000.

The Business Outlook

NEW YORK.—The natural forces of recovery have demonstrated their strength and have a momentum which may reasonably be expected to carry the country into new high ground, says "Banking," the publication of the American Bankers Association, in its August issue. The momentary stimulation following the distribution of bonus funds to the veterans has practically died away and is no longer an important business factor. A certain degree of uncertainty arising from the national political campaign is unavoidable, the magazine says.

Foreign Trade

The Commerce and Marine Commission of the American Bankers Association has made a report which shows that the foreign trade of the world for the year 1935 on the basis of its estimated physical volume was 78.9 per cent of the 1929 level. This was 2.1 per cent above the volume of 1934 and is the highest since 1929. The gold values of world trade were much lower due to the lower commodity prices in January, 1936. The combined index of 75 countries showed 35.7 per cent of the 1929 average.

National Bank Growth

Comptroller of the Currency O'Connor announced recently that total deposits of the 5,374 national banks in the United States on June 30, 1936, the date of the last call made for statements of condition, aggregated \$28,200,453,000. The figure is a new high record for national banks, exceeding by \$1,340,998,000, or 5.39%, the amount reported as of March 4, 1936, the previous high record. The current figures show also that deposits increased \$3,682,207,000, or 16.35%, over the amount reported as of June 29, 1935, the date of the corresponding call a year ago.
