American Farms Are Behind the Times

THIS chart, prepared by the Rural Electrification Administration, illustrates the surprising scarcity of electric service on American farms, despite its almost uniform availability to city people.

Illumination and running water—made possible by electric pumping—are only two of the many advantages which electricity brings to the farm. With them come dependable refrigeration, cool cookery, power for feed grinding and other farm tasks, poultry house illumination for greater egg production, and electric dairy machinery—over two hundred farm uses for electricity have been listed.

PREScribes SIMPLE TREATMENT FOR LAWN

In response to numerous inquiries regarding lawn treatment this spring, N. R. Elliott of the College of Agriculture, University of Kentucky, is recommending four things:

Sow 2 pounds of bluegrass seed per 1,000 square feet.

Apply nitrogen bearing fertilizer, preferably nitrate of soda, at the rate of 5 pounds per 1,000 square feet. Broadcast after the bluegrass seed is sown.

Roll or tamp the lawn, as the freezing and thawing of the severe winter lifted much of grass out of the ground.

Do not use steel garden rake in cleaning lawn, as this will tend to tear out the grass. Sweep the lawn or rake gently with a wooden rake.

GEES RETURNING NORTH

A number of Lebanon people reported seeing a large flock of wild geese flying overhead on the way north Monday morning, says the Lebanon Enterprise. The fowls, easily identified as to species by their honking cries, passed the section between the distillery and the L. & N. depot. Oldtimers say the passing of geese northward is a sure sign that winter is over, and this will be extra good news to everyone considering the rigorous weather the whole country experienced in the last three months.—Lebanon Enterprise.

GEN. LEE'S VALUE ON HIS GOOD NAME

After the Civil War, many offers of positions came to Robert E. Lee. At one time he was offered the presidency of an insurance company, at a salary of \$50,000 a year. He promptly refused, saying that he knew nothing about the business.

"But you will not be expected to do any work," protested the representative of the insurance company.
