FOUND DEAD IN HIS AUTO

William T. Stone, 69, Stanford contractor and Lincoln County WPA supervisor, was found dead at the wheel of his automobile about 10:30 a.m. Monday.

Mr. Stone, who left home that morning seemingly in good health to investigate work on a WPA project near Hustonville, was seen to stop his car near the offices of Dr. L. J. Jones and Dr. E. E. Weddle. After a time, passersby summoned the doctors, who pronounced him dead of a heart attack.

BOUGHT FOR 12¢ GUNS
THAT COST U. S. \$700

Testifying at the closing session of the 20-month senate munitions committee investigation in Washington, Jacob Paley, a New York City junk dealer, told how he purchased for 12¢ guns which cost \$700. Paley said he bought more than 3,000 old army machine guns. Many of them never had been used. Paley said junk dealers resold guns to Latin American countries.

SHOP'FINIS' FOR INTERURBAN
OUT OF NICHOLASVILLE

A score or more of workmen began this week dismantling the old interurban tracks between Nicholasville and Lexington. In the early days of its existence the company did a big business, and also real estate along the line went up in prices as suburban homes began to be built along its line, and there were predictions that in time the two cities would merge. Automobile and bus service rendered the interurban obsolete.

It was estimated that the cost of the twelve miles when constructed was about \$1600 a mile.

DOG HAS GOLD TOOTH

Mush MacFarlane, his master claims is the only dog in California—maybe in the country—to have a genuine gold tooth. The tooth replaces a broken eye tooth. Mush raised no fuss when the dentist installed it.

Deer Hide Book

A book of falconry and hawking, published in the year 1611, was bound in part at least, in the skin of a deer.

PENSION APPLICATION

Applicants for pensions under Kentucky's old-age pension law are warned by Walter W. Mulbry, secretary to Gov. A. B. Chandler, that it is not necessary to pay anyone a fee for application blanks or for any other service relative to the pension.

Mulbry's warning was in the form of letters sent to a number of aged Kentuckians who have written the Governor's office relative to the pension, payment of which will start next July 1.

Mulbry said Governor Chandler had been advised that in some parts of the State lawyers are charging aged persons from \$1 to \$4 as a fee for handling pension applications.

DANVILLE PICTURE SHOW
TO HAVE NEW HOME

Construction of a new theatre for the city of Danville will be started about the middle of March, according to an announcement by officials of the Warner Brothers' Company. Officials of the company, which operate the Kentucky Theatre in that city, stated that the new theatre would be located in the old Frank Building at the corner of Main and Second Streets.

The new show house, with a seating capacity of 450 persons, will be opened sometime during the month of April and will be one of the most outstanding small theatre houses in this section.

LIBRARY NOTES

During the period of zero and sub-zero weather and the hardships and inconveniences that accompanied it, the directors deemed it expedient to close the Library early upon a few occasions. Now that more moderate weather must be in store for us, the Library will open as usual on Wednesdays and Saturdays from 1:30 p.m. to 6 p.m. and from 7 p.m. to 8:30 p.m.

The last Biennial report of the Ky. Library Commission contained a Biographical sketch of the late Miss Fannie Castlemann Rawson, Pioneer of Library Extension Work in Kentucky, written by Mrs. H. E. Nelson, Louisville. In this sketch, Mrs. Nelson pays the following tribute to Miss Rawson: "There can be no finer memorial than a growing, thriving work started by the efforts of one who has died. No more imposing monument is needed than the joy and uplift given to minds and souls, where pleasures are few and life is hard. No more loving tribute can be paid than the memory of loy-

alty and sincerity in the hearts of friends. These things can be said of Fannie C. Rawson and her great work for Library Extension in Kentucky."

"She had a vision, she saw a light on the mountain top, and with unflagging zeal, she followed its shining, until the marvelous world which lies between the covers of books was placed within the reach of the humblest in the most inaccessible regions of Kentucky. She left her beloved old state something which cannot be reckoned in dollars and cents, but which will, as years go on, bring greater and greater spiritual and intellectual returns in the upbuilding of character and mind. As few are privileged to do in this world, she rounded out her work, and quietly withdrew, leaving her spirit, ever vital to carry on, wherever books are read and minds are seeking for more knowledge in Kentucky."

Mrs. Leon Morgan,
Press Chairman.

Work of Our Minds

Knowledge must be gained by ourselves. Mankind may supply us with facts; but the results, even if they agree with previous ones, must be the work of our own minds.

Where Oil, Gas Are Found

Many persons have the impression that oil and gas are found in great caverns under vast domes, in open spaces, hundreds or thousands of feet down. That is not the case. Both oil and gas are within rock, sandstone, limestone, or conglomerate that is highly porous. It is under terrific pressure, having been sealed in by some layer of impervious rock just above it, annealed as it were. When a well taps that impervious roof, and reaches down into the sandstone, pressure is released at that point and the gas or oil filters through the rock toward a possible release. In time it comes flowing up. Whole areas in time go dry.

Many Supplies Needed

The Bell Telephone company uses annually 8,500,000 pencils, 77,000,000 pins, 60,000,000 paper clips, 92,000,000 pounds of paper, \$20,000,000 paper towels, 1,214,000 poles and 6,800,000 pounds of brass.

Culture From Daily Task

If a man or woman gets no culture out of his daily work there is precious little he can get out of anything else.

First Bathtub "Health Menace" America's first bathtub was built in Cincinnati in 1842. It was of mahogany, lined with sheet-lead, and was exhibited at a party. Next day, local papers denounced it as "luxurious and democratic vanity." Medical men took it up and pronounced the bathtub a "menace to health." In 1843, Philadelphia undertook by public ordinance to prohibit bathing between November 1 and March 15. Two years later Boston made bathing unlawful except when prescribed by physicians. Bathtubs were taxed \$30 yearly. And that was only a little more than 90 years ago.
