5 Yds. For 39c**BASKETBALL****VERSAILLES 3 POINTS OVER HARRODSBURG**

In one of the most interesting and well fought games of the season the Harrodsburg Pioneers held the Versailles team to a three-point victory at the local gym Friday night. The Versailles team had lost only two games, and the Pioneers had won only two. At the beginning of the game promised to be one-sided, but did not continue that way very long for at the end of the first quarter the score was four to five in favor of Versailles. Scoring was close throughout the game.

Houchins played best for the Pioneers, making 6 points and Mullins led the Versailles five with 10 points.

Line-up was as follows. H'burg (18) Pos. (2) V'sailles Sadler (4) F. Dzodler Bohon (1) F. (10) Mullins Horn (4) C. (3) Murphy Houchins (6) G. (5) Blackburn Burns (3) G. (1) Wilder Versailles subs: Wilder, Dunn, Chandler (2).

Nicholasville high Tarantulas won their first Central Kentucky Conference game of the season at Nicholasville, Saturday night, defeating Harrodsburg 33 to 17, in a contest that was postponed from last month.

Coach N. R. Williams' team jumped into a 6-2 lead in the first quarter and at halftime was far out in front, 20 to 4. At the end of the third period the count stood 28 to 10.

Goss, with 12 points, and Carney, with eight, led the Tarantulas scorers, while Sadler paced Harrodsburg with eight markers.

VERSAILLES WINS, 21 TO 18
The Harrodsburg Pioneers threw a big scare into the vaunted Versailles Yellowjackets Friday night at the gym here before losing a 21-18 verdict. After the winners had commanded a 12-6 advantage at half-time, the Pioneers began to whittle the lead away, and were on the margin of victory as the game ended.

Mullins led the Versailles offense with 10 points, while Houchins made six for Harrodsburg.

WESTSIDE DEFEATS FEE AND SCALPS BATE TEAM

The Westside "Scalpers" closed their home season Tuesday night, in a most impressive manner by defeating the highly talented Fee high school netters, of Maysville, by a score of 31 to 8. The visitors trailed throughout the contest, the period scores being 8 to 2; 12 to 4; 20 to 6.

The West Side High "Scalpers" journeyed to Danville Friday night and upset the dope bucket by trouncing the Bate High Netters by the top-heavy score of 31 to 11. The local team employed a fast-breaking offense which completely bewildered their opponents.

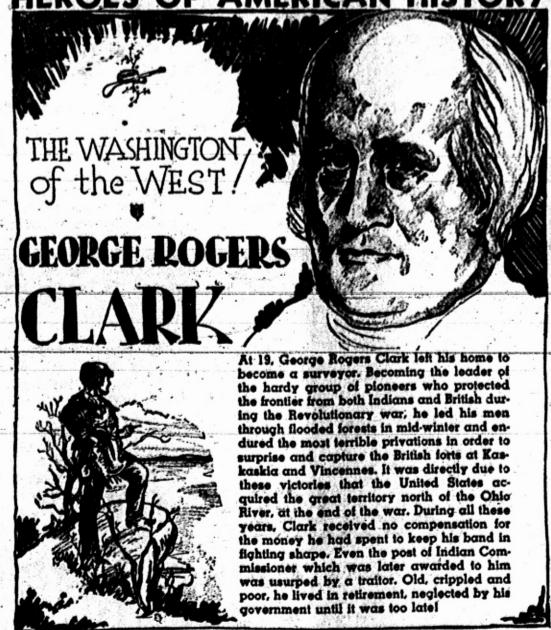

The Danville aggregation was never in the running from the start, the first quarter score being 8 to 1; the half score 15 to 5. The shifting zone defense of the local team proved practically impregnable, holding the Bate team to four field goals, three being by the long shot route. Williams lead the local team with fourteen points, yet the play of the team as a whole was especially fine.

PLANTING HINTS FOR LETTUCE GROWERS
Most women, and many men as well, know that lettuce placed in cold water or wrapped in a cloth and placed on ice before it is prepared for serving, tends to be more crisp and tender.

But how many realize that lettuce seeds will also react to icy moisture? Scientists of the Ferry-Morse Seed Breeding Institute advise gardeners, particularly those in warmer sections, to store lettuce seed in a moist state on ice for a few days if they desire speedier germination. Before planting, dry sufficiently so that handling is easy.

They also recommend the planting of the seed in the cool of the evening with the temperature somewhere around the 60 and 65 degree mark—the temperature best suited for the germination of most varieties of lettuce seed.

HEROES OF AMERICAN HISTORY

At 19, George Rogers Clark left his home to become a surveyor. Becoming the leader of the hardy group of pioneers who protected the frontier from both Indians and British during the Revolutionary war, he led his men through flooded forests in mid-winter and endured the most terrible privations in order to surprise and capture the British fort at Kaskaskia and Vincennes. It was directly due to these victories that the United States acquired the great territory north of the Ohio River, at the end of the war. During all these years, Clark received no compensation for the money he had spent to keep his band in fighting shape. Even the post of Indian Commissioner which was later awarded to him was usurped by a traitor. Old, crippled and poor, he lived in retirement, neglected by his government until it was too late!

Durbar, a Court

The word durbar is Hindustani, and signifies a court or place of judgment where things of importance to the state or tribe are decided. The vice-roy and other governors of India hold durbars. Queen Victoria was proclaimed empress at a magnificent durbar at Delhi in 1877.

Iron Cause of Rosy Cheeks

Rosy cheeks are due to iron with a trace of manganese and copper, and when the iron fades, rosy cheeks fade, according to Sir Frederick Keeble, a London scientist.

Nile Fish Challenge Anglers

Africa, the land of big game hunting, is also the land of big game fishing. At Atbara, 1,500 miles up the Nile river from the ocean, Nile perch, a game fish weighing up to 200 pounds, is caught, as well as tiger fish, which weigh as much as 15 pounds. The tiger fish is almost a bulldog in ferocity.

Rabbit Hairs 1,500 Years Old

Hairs from clothing worn by people inhabiting the Southwest more than fifteen centuries ago were identified as those of rabbits by a biologist.

UNWARRANTED PUBLICITY
The recent publication of incomes of those in the higher brackets served as a renewed reminder of the foolishness of the procedure. There is no good reason for such publicity for it does not serve the purpose that its proponents set forth.

It gives racketeers and hoodlums a guide for future victims and places the safety of those and their families who receive the undesirable publicity in jeopardy.

The amounts given are in error in many instances and misleading. The curious are given material for gossip and often personal harm is wrought merely through the misinformation that appears.

Senator Copeland is now proposing the repeal of this law which publicizes the incomes of all who receive over \$15,000 a year. His suggestion should receive the attention and action that it deserves.

COUNTRY NEWSPAPER IS BIG HELP TO COMMUNITY

Ex-Governor Francis of Missouri is quoted as having said:

"Each year the local paper gives from \$500 to \$1,000 in free lines to the community in which it is located. No other agent can or will do this."

"The editor, in proportion to his means, does more for his own town than any other ten men, and in all fairness he ought to be supported, not because you like him or admire his writings, but because the local paper is the best investment a community can make."

"Today the editors of the local papers do the most for the least money of any people on earth."

CIRCULAR ADVERTISING NOT VERY EFFECTIVE

H. A. Sweeney, advertising manager of the National Retailer Owned Grocers Association, announced in Chicago this week the organization would increase its newspaper advertising by 20 per cent during the coming year. Last year, he said, about \$2,000,000 was spent.

"Circular advertising by individual grocers was proved ineffective," he said, at the association's annual convention. "Newspaper advertisements more readily reach the consumers and are less expensive."

PIONEER PARK NOTES(H. C. Wood, Curator)
One cause of our hard winter With all its stress and dole Was letting Byrd go southward And open up the Pole.

Last Sunday the esplanade was the parking place for quite a number of cars from various sections of the country, while the largest number of visitors during the winter months was taking in the alluring sights of the Park. Some of the people were on their way south, some returning from the land of sunshine and flowers.

The weatherman has won recent favor by giving us a mild imitation of spring during the first of the week. Keep it up, old fellow, keep it up!

The little pool below the Fort spring seemed to freeze solid during the zero weather of the past several weeks, and we were quite disturbed at thoughts of the small company of fish enclosed therein.

Since the thaw and pleasant change in temperature, Mr. Sallee broke several holes in the ice and found the fish still alive and active. Whether it was a case of suspended animation or not, these finny inmates of the pool seem no worse off for their arctic experience, and are as lively as they were in summer time.
