PRESIDENT: Gloria Bailey

Student Council

The year 1961 has been a great year! To us, it has been the start of our senior year in high school. To the world, it has been a time of significant changes and scientific advances. Soon, we, as graduating seniors, are going out into that world. Let's take a look at some of the changes.

John F. Kennedy, the first Roman Catholic to achieve the honor of becoming President, took office as the thirty-fifth President of the United States in January of 1961. President Kennedy's "New Frontier", as his administration has come to be known, set up a group known as the Peace Corps to strengthen our relations with other countries. Sam Rayburn, the man with the longest term as Speaker of the House of Representatives, died at his home in Texas with cancer.

The glittering world of entertainment was saddened by the deaths of the "King", Clark Gable, Ernest Hemingway, Ward Bond, and James Thurber. "Ben-Hur", "A Summer Place", "Exodus", "The Guns of Navarone", and the re-release of "Gone With the Wind" were the top movies. The books most widely read were THE UGLY AMERICAN, THE STATUS SEEKERS, HAWAII, EXODUS, ADVISE AND CONSENT, and TO KILL A MOCKINGBIRD. The teenagers were learning the Twist, the Stomp, and the Fly. The songs they were dancing to included "The Fly", "Big John", "A Summer Place", "Blue Moon", "Exodus", "Mack The Knife", and many others.

The major advancement in science was the launching of a man into space. The U.S.S.R. was first with Yuri Gagarin and the United States followed with Alan Shephard. This step-up in the space program was the result of the cold war between Capitalism and Socialism. Besides the development of manned space flights, other achievements include the Polaris submarine and the larger bombs. While nations are busily completing their nuclear arsenals for protection, heart disease remained the number one killer.

This was also the year of a heightening of world tension as the Soviet Union and the United States fought a "war of words" for world supremacy. The Soviet Union continued nuclear testing in the atmosphere and exploded the largest bomb to date, a fifty megaton bomb equal to 50 million tons of dynamite. East and West Berlin became the headline topic when the Communists built a wall dividing the city. Laos, North Vietnam, the Congo, Red China, Kuwait, Cuba, Dominican Republic, and South Korea have also been major trouble spots of the world this year. The United Nations, man's hope for peace, suffered a severe blow from the death of Secretary General Dag Hammarskjold in a plane crash.

The New York Yankees won the World Series Pennant, winning four games to one over the Cincinnati Redlegs. The Green Bay Packers took the National Football League championship. The National Heavyweight title changed hands several times this year with Floyd Patterson finally securing it by defeating Ingemar Johansson in a return match.

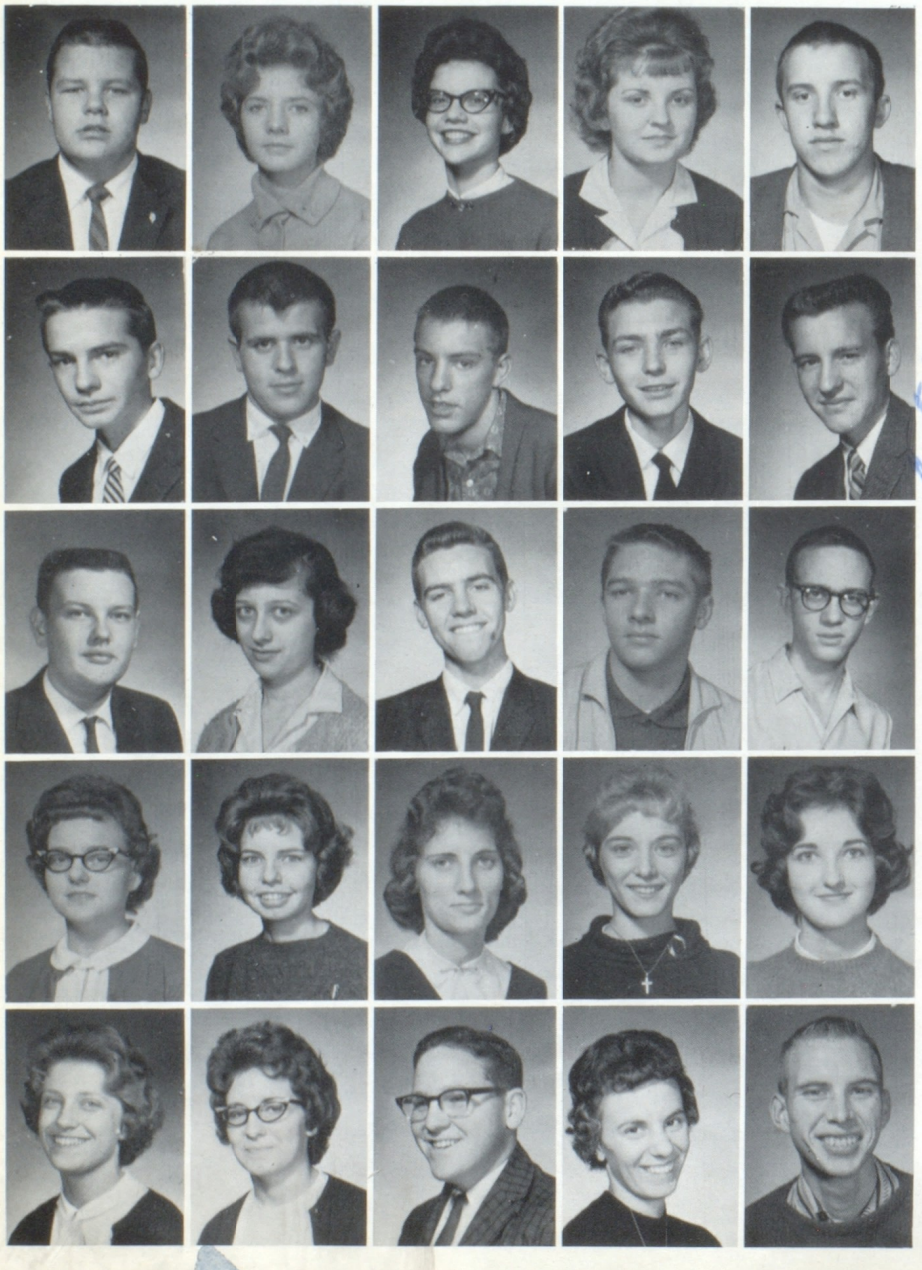

So comes to an end the year of 1961. But what of future years? We cannot predict with certainty the outcome of tomorrow, but we can insure it to some extent by preparing ourselves and those who come after us for the destinies we must face.

Carrie Love,
Best of luck to a real sweet gal and cute one at that. You're a real swell friend and remember the night you spent the night with me and we went to the Redwood. Remember our World History class and our sophomore year. Thanks for everything Love ya,
Frances
