The 1936 Red Cross Poster

THIS year's American Red Cross poster emphasizes the theme that the Red Cross is "of, by and for the people." Four million men and women are members of the Red Cross and through their membership dues they support its activities. Only in time of major disaster when needs for relief reach great proportions does the Red Cross ask the public for disaster relief funds. The membership funds represent the financial support of the Red Cross, and in

turn this money is used to carry the Red Cross work of mercy to distressed citizens. Membership is open to all, without regard to race, color or creed, and the Red Cross services are given to all, without restriction.
The annual Roll Call for members is held Armistice Day to Thanksgiving Day, November 11-28.
The poster for 1936, as by Walter W. Seaton, noted illustrator and painter of movie and radio stars.

THREE NEW SLIPPERS
IN THE AUTUMN MODE

New York-Paris Fashions

THESE three high style designs in new fall footwear are particularly interesting because they are made by the up-to-date Sbicca method which eliminates stitching and prevents ripping or peeling of the sole. Their outer soles are attached with an adhesive prepared especially for that purpose. The two lower models have scuffless heels, sure protection against the scuffs and scars that are often the hazards of tea dancing.

At the top is an informal or semi-formal one strap cut-out slipper of gabardine and patent leather trim accented by contrasting stitching. The high strap carries out the new higher instep line, a feature of the season's styles. Below, is a brown suede oxford for street wear with shiny leather lacings and heels to highlight the dull background. At the bottom, the oxford is in patent leather and suede with a trick cut. Simple, yet rich because of its texture contrast, it shows a high instep cut, and is ideal for afternoon wear.

Saltwater Mines

There is an Illinois statute which makes it a criminal offense to work a saltwater mine without protecting it from the approach of cattle by erecting a fence. Historians may recall that saltwater (potassium nitrate) mines at one time were necessary if our pioneer ancestors were kept supplied with the all important gunpowder.
