DON'T FOOL YOURSELF
If you suddenly discovered that the gasoline in your car is about exhausted, don't speed up in order to reach the next filling station—slow down. Experiments have shown that, other things being equal, more mileage is obtained from a gallon of gasoline when an automobile is driven at moderate speed than when it is driven at high speed. You will understand why this is true from the fact that more force is required to propel a car at high speed than at low speed, because of wind resistance.

Spain Turns A Castle Unto Library

Other parts of Europe may be rearming, but Spain calls attention to the fact that it has just turned its old castle of Simancas at Valladolid into a library. Its warlike atmosphere has been transformed.

Fifty-two rooms have been given over to books. Some were there long before, as the castle was owned at one time by the King, Charles V, who in 1549 laid the foundations of a small but valuable book collection.

Details of the political negotiations with Germany, Saxony, Poland, Prussia and Hamburg since 1403 and with France since 1567, figure in the archives. Legal, political, social and municipal history is recorded among the millions of pages on these shelves.

In addition, interesting domestic details are available, and the modern housewife may find with envy that in the days of the sixteenth century a loaf of bread cost half a cent, eighteen kilos of olive oil cost 45 cents, four pounds of beef cost half a cent and a quart of milk a fifth of a cent.

Your Family Coat-of-Arms

Morris

The above Coat of Arms was used by Lewis Morris, Lord of the Manor of Morrisania in 1697. The Emigrant was of Welsh extraction, the family originating from Tintern County Monmouth. The Welsh spelling of the name was

Mawr Rys or the Great Rys. Lewis Morris was the first governor of New Jersey in 1738. He died in 1746 at the age of 73. His oldest son was a Brigadier General in the Continental Army and one of the signers of the Declaration of Independence. Another son Governor, was Minister to France and a United States Senator. A third son Richard was a Judge of the admiralty. There is another, also well known family of Morris, descendants of Amos Morris of East Haven Ct.

Description of Arms: Lions gold on a blue background, three red circles on silver background.

Crest: A Castle in flames.

Motto: He conquered at last.

UNARMED POLICE CHIEF IN KENTUCKY MOUNTAINS

James Kembrell, 54, police chief of Neon, Pike county, has been a peace officer twenty-five years and has never carried a gun or had serious trouble with a prisoner, altho he has arrested killers within a few minutes after the crime. He swore off drinking July 4, 1908, and has never broken over. He does a little barbering and "fiddlin'" when not busy with official duties. Years ago he broke a leg pulling off a wet boot. "Bad men are not so bad," he says, "if you treat 'em right."

Sportsmanlike Driving Subject of Pamphlet

Manual Sent Out By Blue Grass Automobile Club to All School Superintendents in State.

A specially prepared manual for use in teaching safety in the public high schools has been forwarded to all school superintendents in central and southeastern Kentucky, it was announced by Glen Weinman, secretary of the Blue Grass Automobile Club.

The booklet which has been prepared by the motor organization is entitled "Sportsmanlike Driving" and will aid instructors in making the subject of safety a regular part of the school curriculum, Mr. Weinman stated.

The manual points out the need of safety education in the schools by showing the traffic accident records during period 1922-1933. During the ten year period, the traffic death rate for children in the five to nine year group decreased 25 per cent; for the age group ten to fourteen increased 3 per cent; while in sharp contrast to these, the death rate for the fifteen to nineteen age group increased 130 per cent.

Facts are also shown that during the lives of every 100 youths 16 years old, 12 will be killed or seriously injured and 65 will sustain minor injuries or a total of 77 will be killed or injured in traffic accidents of the present trend continues.

The Automobile Club has also made available to the grade schools a series of safety posters which are to be distributed monthly. Each poster portrays some idea which is to aid the instruction of safety.

Mr. Weinman stated that the program was being introduced at the request of many teachers who are vitally interested in the subject of safety but have been handicapped in introducing a suitable course due to the lack of proper material.

OLD SPANISH DOLLAR (Courier-Journal)

Discovery of a Spanish dollar, minted in 1779, uncovered by a Woodford county plow, is a rare find, but not difficult to account for. What it is worth as a souvenir probably is no greater than its value in Virginia paper money at the time it was lost.

Kentucky was using foreign coins brought in by General Wilkinson's New Orleans tobacco trade, "the doubleons and plasters of Spain, the louis d'ecus of France, the ducatos and the rix dollars of Holland, the gouds and ducats of Austria, the frederies and florins of Prussia, the crusadores and moidores of Portugal, the lires and pistoles of Italy, the sequins and tomonts of Arabia and the maces and rupees of India"; but most of them drained off East for things Kentucky didn't manufacture.

There never was enough money,

and when it was unavailable, skins,

tobacco warehouse receipts or Vir-

ginia land warrants served as the

medium of exchange. Barter was

prevalent after Kentucky attained

statehood. Coins which circulated

on their intrinsic value were at a

premium. Early Governors were

concerned about industrial develop-

ment to conserve the supply of mon-

ey. Credit was scarce and interest

rates high, but embargoes and the

War of 1812 gave an impetus to

manufacturing. Paper money, how-

ever, produced inflation and conse-

quent disaster. That Spanish coin

is a memento of distress that has

survived from the days of the Span-

ish Conspiracy, through the "Old and

New Court Fight" and the collapse

of "Coolidge Prosperity" to witness

the importance of a medium of ex-

change adjusted to economic condi-

tions.

MONT THE MOON SLEPT

There was no full moon in the month of February, 1886—and it was known at that time as the month the moon slept. There was no full moon in February, 1915 and 1934, but there will not likely be another such month until 1961.

A new glass has been made by the admixture of a little iron which will stop more than 50 per cent of the sun's heat.

Protection Beauty Economy

The three things to expect from paint.

PROTECTION—Kurfees 80% Lead and 20% Zinc—100% Pure Paint protects the surface with a film that is weatherproof, hides the surface and keeps out dampness as no half lead or adulterated paint can do.

BEAUTY—Kurfees 80 and 20 is made in numerous colors and tints and a glance at the color card will convince you of the beautiful color combinations possible.

ECONOMY—There is no other paint like 80 and 20. It is the purest, best and finest house paint that money can buy. Cheap paints contain clay, chalk, adulterated oils and water. Cheap paints are cheap only in price per can.

Compare formulas. If the manufacturer is afraid to print his formula you be afraid to buy his paint.

FUR STORAGE CLEANING REPAIRING

NOW

The Chemical Fumigation

Fur Storage Vault

In keeping with our policy of offering our clientele the greatest service possible, we have recently installed a new Fur Storage Vault employing the chemical-fumigation process. The new process is the only known practical method of absolutely ridding a garment of all traces of moth or vermin life. The moth, the larvae, and the moth eggs are entirely destroyed. Make certain your furs and garments are completely rid of these pests.
