A presentation of  
THE  
ASSOCIATION  
OF  
AMERICAN  
RAILROADS

TRANSPORTATION BLDG. WASHINGTON 6, D. C.

Throughout the length . . .

. . . and breadth of our land . . .

. . . stretches the vast network of  
American railroads. . .

. . . linking cities and towns . . .

... in every part of the country.

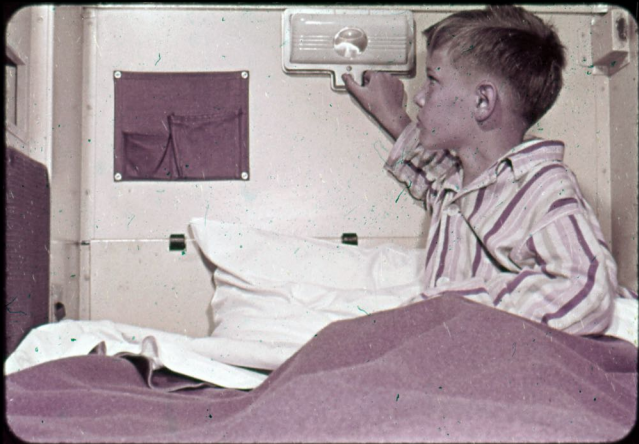

Over the shining rails . . .

... speed modern streamlined trains ...

. . . marvels of comfort, safety, and speed.

On them you may sleep . . .

... and eat ...

... and view the ever-changing  
panorama...

... of North America.

And during every minute of your  
journey . . .

. . . railroads work to promote safety . . .

... among their own employees ...

... and for the millions who travel.

Tracks are kept strong and safe . . .

. . . for trains to run upon.

Railroads install safety signals . . .

... and maintain them...

... and train control systems.

They put warning signs at highway-rail crossings . . .

... and keep them in good condition...

... to help highway users protect themselves.

In summer . . .

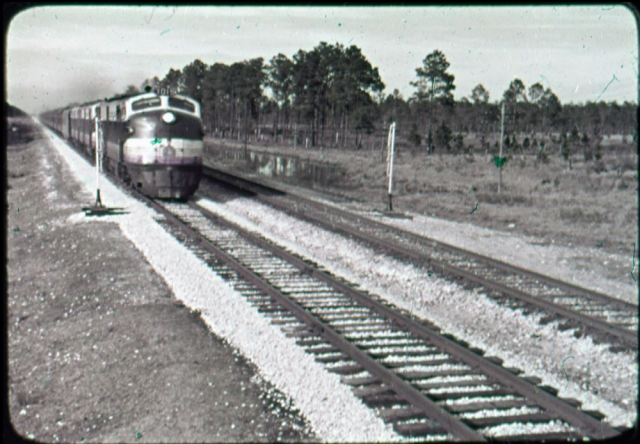

. . . or winter . . .

... as your train speeds along ...

. . . through eastern countryside . . .

. . . or southern pines . . .

... or the fields of the mid-west ...

... or the plains ...

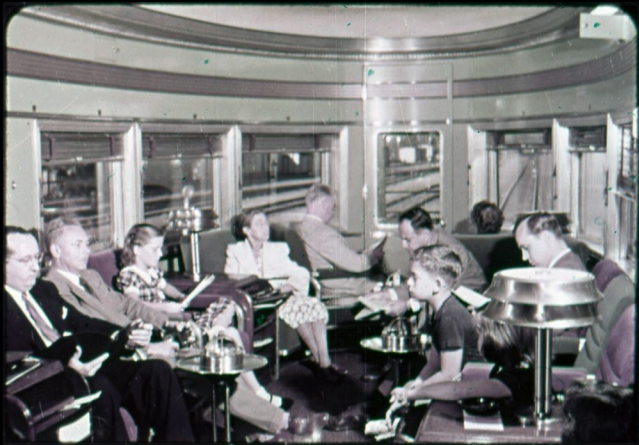

... or the desert ...

. . . or the western mountains . . .

. . . railroads use every modern  
improvement . . .

... to make your trip comfortable,  
convenient, and safe.
