Gentlemen:-

In reply to your several letters of the 20th ult. and the 11th inst. would say delay in answering was due to our plans for 1917 not having been definitely decided upon. However, we have concluded for the present, at least, to continue to make the same car we made for some time past of which we sent you illustration and description at the beginning of the present season. Would therefore ask you to use that matter now.

We have not issued an instruction book.

Regarding the power curves would call your attention to the fact that we are using the Lycoming 3 1/4 by 5 motor with which you are no doubt familiar since Dort and several other cars are using the same.

Hoping that this will answer your purpose, we are,

Respectfully yours,

THE ARBENZ MOTOR CAR CO.

*F. C. Arbenz*
