## THE MASTER PLAN . . .

It's fall, and the students are back again. But there's a lot of things that are different than last year. Over the summer the pigs began a rampage of busting and hassling every person within sight of the Ave. in an attempt to run us out of Berkeley. They've also completed the first stage of rebuilding the Telegraph area by tearing up and putting back together what once was our street, and they are in the process of completely changing the whole Telegraph area.

The reason that all this is happening is because the pigs that run this city, namely the Regents of the University and their lackeys, have what is known as a "master plan." The "master plan" is

owns the land. As we found out from People's Park, it's the University who owns and controls this town lock stock and barrel. This means that all of us face a common enemy, the REGENTS of the UNIVERSITY of CALIFORNIA, who are some of the fattest and greediest snouts alive!!!

In order to defeat our common enemy and make Berkeley a place which is used for the people and NOT for the Regents it is gonna be necessary to build a strong United Front of all people who oppose the Regent's Master Plan. This includes street people, students, Third World people, and working people. All these people have interests which are in conflict with what the Regents want to

What does a united front mean to us? It means we don't fight each other, but we fight the pigs, and get it together to work for what we want. A lot of our brothers and sisters are getting ripped off by the pigs. A united front means that we all work to protect our sisters and brothers. Things like street patrols to patrol the pigs, getting all your neighbors to start watching out for each other, phone trees, are all concrete ways of helping to protect yourself and your sisters and brothers.

A united front means if they raise the rents to prices that are too much for us to pay, if we have bad housing conditions or if they (the pigs) are trying to tear our houses down
