

## Condition Report: Outgoing Loan in Process

Jan 31, 2020

**Title:** Le Nettoyage Des Cuivres (Cleaning the Copper) **Id:** 2015.47.1

**Type:** Painting

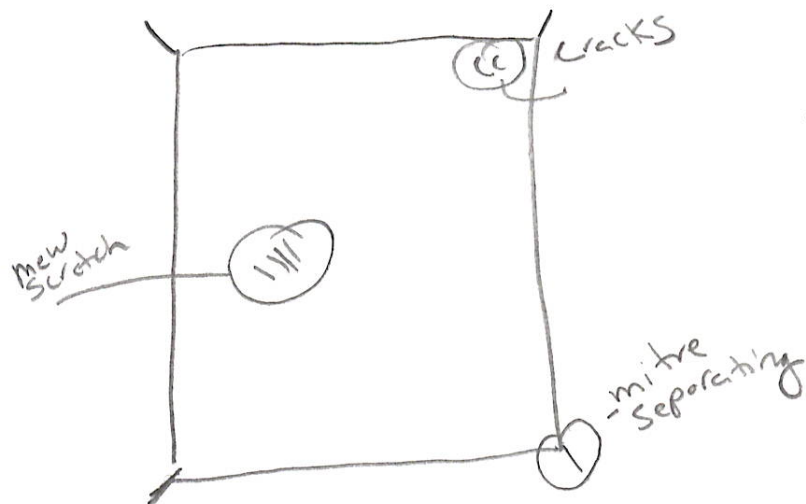

**Description:** Painting depicting 2 women cleaning copper. One is reading a book sitting in front of the window with the copper pots sitting next to her.

**Condition:** Overall Condition: Fair; Condition Detail: Crackle / Craquelure; Condition Notes: Painting is in overall stable condition. Needs surface cleaning - varnish is dark due to years of exposure to environmental contaminants. In raking light, heavy craquelure patterns throughout are evident. In normal light the pattern is not visually distracting. See images in record for details of the most severe areas. Conservation assessment is required to identify the stability of these cracks to determine if any are in need of consolidation. Small losses at edge of painting - possibly from shifting in the frame. Painting is not backed - installation of a suitable backing board is recommended. Complete incoming condition report with diagrams is located in the physical accession file. To be scanned and added to this record at a later date.; **Date Examined:** Dec 3, 2015; **Examined By:** Kili N. Cooper
