NO COPIES OF THE SOUTHERN CALIFORNIAN
ARE MAILED REGULARLY TO ANY ONE UNLESS
PAID FOR OR SPECIALLY ORDERED, HENCE NO
ONE NEED HESITATE ABOUT TAKING THE PAPER
FROM THE OFFICE.

Entered at the Post Office at Lordsburg,
California as second class matter, July 11 1890

Church Directory.

BRETHREN—Sunday School at the Lordsburg
Hotel at 10 a. m., prayer meeting at 7:30 p. m.
every Sunday.

PRESBYTERIAN—At Lordsburg school house,
Sunday, May 11, at 3:30 p. m. Sunday school,
at 2 p. m., and every other Sunday there after
Rev. J. A. Gordon D. D., pastor.

BAPTIST—At Lordsburg school house, May
18, at 3:30 p. m. Sunday School at 2:30 p. m.
and every other Sunday thereafter.
Rev. G. S. Bailey D. D., pastor.

Injurious Insects.

Continued From our Last.

The first, second, and third pairs of
spines of each surface are situated
near the lateral bases of the first, sec-
ond, and third lobes, respectively; the
fourth pair are situated at a little
more than one half the distance from
the median lobes to the penultimate
segment. In each case the spine on
the ventral surface is but little laterad
of the one on the dorsal surface.

Eggs—The eggs and newly hatched
larvæ are yellow.

Male.—Only dead and shriveled
males have been observed.

Habitat.—On the bark of the trunk
and limbs, as well as the leaves and
fruit of various trees and shrubs.
Described from seventy-five females
and very many scales.

I have named this the greedy scale
insect, on account of the great num-
ber of plants upon which the species
subsists. It also occurs in some local-
ities in great numbers, being very des-
tructive. This is especially the case
on *Euonymus japonicus* and on the
olive, and on mountain laurel (*Umbel-
ularia californica*). I have also found
it on the following named plants: al-
mond, quince, fig, willow, cucalypus,
acacia, and locust.

Remedy.

This scale infests the apple and the

pear, and is quite troublesome, as it
gets on the fruit; however, it is not
very injurious. Use the same reme-
dies recommende for pernicious (*As-
pidiotus perniciosus*) scale; this scale is
of the same genus.

CONVEX OR WILLOW SCALE.

Aspidiotus convexus, Comstock.

This species, which is very common
on the bark of the tree and limbs of
the native willows, very closely
resembles *Aspidiotus rapax* in the
shape and color of its scale. The res-
emblance of the two species is so
great, that at first I considered them
identical, and concluded that *A. rapax*
had spread to the cultivated trees
from the native willows. But a care-
ful study of the structure of the two
forms shows them to be specifically
distinct. The most striking differen-
ces are those presented by the last
abdominal segment of the female.
In this species there are four groups
of spinnerets, the superior laterals
consisting of about seven, and the
inferior laterals of about four. In
A. rapax the groups of spinnerets are
wanting.

In this species the plates are very
much shorter than in *A. rapax* and
very closely resembles the plates in
A. ancyclus. But *A. convexus* differs
greatly from *A. ancyclus* in the shape
and color of the scale, and in the
wings of the male being long. De-
scribed from seven females, two males
and very many scales.

Remedy.

Use the same remedy for red scale
(*A. aurantii*) when on evergreens,
and the remedies for San Jose scale
[*A. perniciosus*], on deciduous trees.

GENUS DIASPIS.

This genus includes species of *Dias-
pina* in which the scale of the female is
more or less rounded, with the exuvia
at the center or upon the side; and
the scale of the male long, white, cari-
nated, and with the larval skin at one
extremity. The last segment of the
female presents five groups of spinner-
ets.

This genus closely resembles *Aspi-
diotus* in the form of the scale of the
female, but it is easily distinguished
from that genus by the form of the
scale of the male.

JUNIPER SCALE.

Diaspis carueli, Targ.

Scale of Female.—The scale of the
female is circular, snowy white, with
the exuvia central or nearly so, naked,
and yellow. Diameter of the scale,
1 mm.—1.5 mm. [.04—.06 inch].

Female.—The females are yellow,
circular in outline, a little elongated
posteriorly. The last segment of the
body presents the following charac-
ters.

The anterior group of spinnerets
consists of about, the anterior laterals

of from ten to sixteen, and the poster-
ior laterals of about eight.

There are four lobes, which are
nearly in a straight line, the end of
the body being truncate. These lobes
are quite small, rounded posteriorly
and are equidistant from each other.

The second lobe of each side is
deeply incised, but the lateral lobule
is very small, and in many cases con-
cealed by the margin of the segment.

Each lateral margin of the segment
is divided into three subequal more or
less distinct lobes; each lobe ends pos-
teriorly in one or two lobules, each of
which bears an elongated pore on its
dorsal surface.

The plates are short, and in some
cases subtruncate at extremities; they
are situated as follows: Two between
median lobes; two inconspicuous
ones laterad of first lobe of each side;
two laterad of second lobe; usually
one on the anterior part of the first
lobe of the lateral margin; one or two
near the middle of the second lobe of
the lateral margin, and two or three
on the third or anterior lobe of the
lateral margin.

The spines on the dorsal surface are
situated as follows: One upon the
first lobe near its lateral margin; one
on lateral lobule of the second lobe;
and one a short distance mesad of the
mesal plate of each of the three lobes
of the lateral margin. On the ven-
tral surface the spine accompanying
the first and second lobes of each side
are obsolete. There is at the base of
the plate of the first lobe of the lateral
margin; one between the plates of the
second lobe, and one near the middle
of the third or anterior lobe of the la-
teral margin.

Scale of Male.—The male scale is
white, and very small, being only 1
mm. (.04 inch) in length; it is elon-
gated, with a prominent median
ridge; the larval skin is naked and
light yellow in color.

Male.—The color of the body is
light orange yellow, with the thoracic
band of the same color. The termi-
nal joints of the antennæ are enlarg-
ed.

Habitat.—This species is very com-
mon. It infests the following named
species of juniper and arbor vitæ;
Juniperus chinensis, *J. rigida*, *J. oxy-
cedrus*, *J. japonica*, *J. communis*, *J.
resinosa*, *Bioda orientalis*, and *Thuja
occidentalis*.

Remedy.

The best remedy for this scale is the
application of a strong salutation of
whale-oil soap, one pound to the gal-
lon of water, applied warm.

ROSE SCALE.

Diaspis rosæ Sandberg.

Scale of female.—The scale of the
female is circular, snowy white (or,
according to Signoret, yellowish white)
with the exuvia light yellow, and up
on one side; the first skin is naked,

the second usually covered with secre-
tion. Diameter, 2 mm.—3 mm. (.08—
.12 inch).

female.—The female is elongated,
resembling in form a *Mytilaspis* more
than a *Diaspis*. The head and thorax
comprise the larger part of the body.
The abdomen is very distinctly sem-
imented, especially upon the sides;
each segment presents one or several
plates, the two segments preceding the
last a greater number, but usually less
than ten. The last segment presents
the following characters:

The groups of spinnerets are re-
markable, from the fact that those of
each side are often more or less con-
tinuous. Signoret stated that the an-
terior group alone is distinct; but in
the majority of the specimens which I
have studied the lateral groups are
more or less distinct. The anterior
group consists of about twenty spin-
nerets the lateral group are of from
twenty-five to thirty-five each. There
are three pairs of lobes. The median
lobes are large, slightly serrate, and
proximate at base, and diverging lat-
erally. The second and third lobes of
each side are deeply incised; the
mesal lobule in each case is the larg-
er.

The plates are long, slender, and
simple. Those nearer the meson are
smaller than those farther removed
from it; they are situated as follows:
One arising from the base of the later-
al margin of each of the three lobes of
each side; one midway between the
meson and the penultimate segment;
two to four near the penultimate seg-
ment—there are commonly only two
in this position, occasionally three,
and sometimes four.

The spines on the dorsal surface
are situated as follows: One on each
small one on each of the lobes of the
on the outer lobule of the second and
third lobes; one mesad of the fourth
plate; and one between the two lateral
plates. On the ventral surface there is
situated a spine a little mesad of each
of the first four dorsal spines.

Scale of male.—The scale of the
male resembles that of other species
of *Diaspis*, in being long, tricarinated,
white, and with the larval skin at one
end; length, 1.25 mm. [.05 inch].

Male.—The male is of a reddish
white, with the wings white, the veins
of the wings rosy; the venter is a little
darker; the style equals the abdomen
in length; antennæ and feet yellowish
slightly pubescent.—Sinnoret.

Specimens which we bred were
bright orange, with the band of the
same color, and the eyes black.

Habitat.—This species infests the
bark of the rose bushes, and on the
bark of blackberry and raspberry
canes.

To be continued.

Some men are like tools, not worth
any thing unless some one handles
them.

Israel at Work.

MOTTO.—Not dull sloth but earnest activity, is the Christian's high privilege through Christ our Lord.

Suffering times have often been growing times with the church.

There are many who pretend to be for the church who care not how seldom they go to church.

In vain do we pretend to seek God in our devotions if we do not seek good in our whole conversation.

Emerson reminds us that we should be as courteous to a man as we are to a picture, in giving him the advantage of a good light.

We glorify God when we are God-admirers—admire His attributes, which are the charter of free grace, and the spiritual cabinet where the pearl of price is hid; the noble effects of His power and wisdom in making the world, which is called "the work of His fingers."

The Northwestern Presbyterian says: The Edgerton school board in Wisconsin kept on reading the Bible notwithstanding the decision of the Supreme Court, until last week. A mandamus was then issued compelling them to stop. It is best to obey the law. But it does not look well for a state to brand the best book in the world as unfit for use in its institutions. We recognize the sacred rights of the Roman Catholic conscience, but we should think they would be proud to see a book used which they claim to have complied and preserved.

Good old fashioned righteousness need to be preached from the pulpit, urged in editorials, insisted on by the voters, demanded and practiced by every patriot, especially every one calling himself a Christian. We do not want politics or business in our religion, but we do want and must have religion in our business and our politics, or we have but little to hope for in coming years. And especially when a man is active in Sunday School or temperance or missionary work, prominent in religious movements and church activities, should his reputation as a business man or a party manager be unspotted, unchallenged, the pride of his friends and acknowledged even by his opponents?—*N. Y. Christian Advocate.*

The way to get good out of the Bible is not to endeavor to see how many chapters you can read in a week, or a month, or year; but how much can you understand; how much good can you bring to the surface and get into your life. Our Savior's instructions were to search the Scriptures—to dig, to seek, to ransack, like a man hunting for buried treasure in a field he has just bought. Gold is never scattered about on the top of the ground, but is hidden where we are obliged to dig for it, and it is so with the treasures of God's word. They are not for the thoughtless and the idle and the indifferent but for those who will seek for them with all the heart. We must look below the surface and read between the lines.

We may be certain of an axiom, but it becomes doubly true, when vouched for by one whose opinion we value.

To all who keep the Sabbath: "If you turn thy foot away from the Sabbath, from doing thy pleasure on my holy day; and call the Sabbath a delight, the holy of the Lord, honorable; and shalt honor him, not doing thine own ways, nor finding thine own pleasure, nor speaking thine own words. Then shalt thou delight thyself in the Lord; and I will cause thee to ride upon the high places of the earth, and feed thee with the heritage of Jacob, for the mouth of the Lord had spoken it."

"Moses, the law-giver of ancient Israel, under the shadow of that awful mountain that trembled with tempest and burned with fire, proclaimed the commandment that linked toil with rest; and gave the order of six days' work being followed with a day of rest. When the greatest law-giver of the gospel age came—the preacher of the Beatitudes—he proclaimed amid the grassy slopes of Hermon the spiritual character of the moral law. He lifted the thoughts of men from the form and the letter to the spirit and the life. If he broke in any detail the outward form of the old Sabbath ceremonies, it was because he might the more thoroughly keep the spirit of it. So doing good, feeding hungry men, or treating the sick, he judged to be just as good Sabbath work as pulling an ass out of a pit. So it came to pass in due course of time that he had to assert that authority as the light of the world, as the wisdom of God belonged to him, and he said: "For the Son of man is Lord also of the Sabbath!" A startling saying, no doubt, to many who heard him speak. Still more startling was the saying: "For the Sabbath was made for man." It was not a divine caprice, but a divine plan. To make a man's life on earth worth living it was necessary that man should have an ever recurring day of rest. And so the Sabbath was made for man. The beautiful and suggestive words of Isaiah concerning the Sabbath have been greatly overlooked; as indeed the whole of Isaiah's words have been underestimated. The world has never seen a greater poet than the prophet Isaiah. His songs of hope, his pictures of a golden age, his calls to faith and courage and abiding patience have no equal in any land or age. He gives God's great promise to Sabbath keepers. And all the history of modern years goes to prove that, as a rule, the Sabbath keepers have ridden upon the high places of the earth. There is one word in this promise of Isaiah's which attracts attention. He speaks of Sabbath keepers as men who make the Sabbath "a delight." And that is just what the Sabbath must be, or it is no Sabbath at all. A "gloomy Sabbath" is a contradiction in terms. If ever the Puritans made the Sabbath a dull and melancholy day, they could only do it by taking all the Sabbath out of the day. We wrong ourselves and our children, we wrong the Lord of the Sabbath and the Sabbath itself, when we fail to make it wholly and in all hours "a delight." To invite a melancholy mood, to look sad, and to feel sour,

and to cast a gloom on all around, would be a strange way of making the Sabbath a delight. We should fill all its hours with songs of gladness, and joyful thoughts, with happy prayers, with tender fellowship in home and church and Sunday School and as we walk by the way. The poor slave in his quarters in the old sad days found Sunday such a delight that his only dream of heaven was an eternal unbroken Sabbath. And there are tens of thousands of "old men and maidens, young men and children" in the courts of the Lord's house and in the happy Christian homes who find sunshine enough in these delightful Sabbath's to fill the intervening weeks with glory."

The Lordsburg *Southern Californian* objects to the crook in our worm fence as illustrated in No 26, and thinks we must be out of practice in fence making. The *S. C.* also wants to know if the *Evangelist* has "ceased fence making so that goats and wild beasts may get in and mingle with and mangle the sheep in the pasture field?"

Well, yes; we are not much in the fence building business now. In the fold we are with there is a shepherd. "To him the porter openeth and the sheep hear his voice. * * * * *

He goeth before them and the sheep follow him, for they know his voice." John 10:3,4. We have observed that a fence cannot be built so high that the "goats and wild beasts" "thieves and robbers" cannot "climb up some other way," and so enter the fold. As an under shepherd we are not commissioned to build walls and fences, but to "Feed the flock of God," (1 Peter 5:2) and to "watch and take heed," for "grievous wolves shall enter in among you, not sparing the flock." Acts 20:28-30. In the day of reckoning the Great Shepherd will divide the sheep from the goats, and he will take his own with him into his own city, whither no wild beasts shall enter, neither anything that maketh afraid. There we shall be walled in, and yet even then "the gates shall not be shut by day, and there shall be no night there." Rev. 21:25. *Brethren Evangelist*

The Northwest *Pre-byterian* says: One choice way to conquer intemperance is to replace the liquor saloon. It need not be an annex to a church or a trap to a prayer meeting affair, neither must it be a gambling den. It will comprise a full-fledged soda fountain outfit, a coffee house and clubhouse on an inexpensive scale.

There are thousands of men who want some place to spend an evening.

They will drop in and cultivate a little goodfellowship. They can spend a nickle or several of them. They like a game, a song, a treat, an orange, or a bit of chaff, or a chance to see some paper, and they could have such accommodations better without alcohol than with it. Open temperance club-houses for the people

We are not ignorant because we do not learn, but because we forget so much.

The man who never looks ahead will always be behindhand.

"So LONG as we are full of self, we are blocked at the faults of others."

The Pacific Land Improvement Co.,

Was incorporated at Los Angeles, under the laws of the State of California, in January, 1887. Its offices are at Rooms 87 and 89 Phillips Block Los Angeles, Cal.

The town sites of

LORDBURG,

CLAREMONT, MEN-

STONE, ETIWANDA, St.

James, Egan, Fullerton,

Manhattan, Benedict,

SANTA FE

SPRINGS

and

SAN JUAN-by-the-SEA.

Are owned by this company; and they have done no small amount of work to make most of those places attractive.

Around some of these town sites and villages may be found orange land of the first quality, and around others raisin land, the very best, while near others may be had alfalfa and walnut lands. In short they are able to meet the demands of customers; and those who contemplate coming to Southern California will not go amiss to open correspondence with the Company, and those coming should call at their office and have some one to show these lands to them. And be sure to say you saw this notice in the SOUTHERN CALIFORNIAN.

PACIFIC LAND IMPROVEMENT Co.,

MISCELANEOUS.

Hard Luck.

Life.

"Why so downcast?"

"I lost a magnificent umbrella yesterday."

"Leave it in the car?"

"No; I met the owner on the street and he recognized it at once."

After the Visitors Had Gone,

Life.

Sadie: Say, mamma, keep them on a little while.

"Keep what on, dear?"

"Your company manners."

Praise for Her Dear Friend,

Life.

"I heard a compliment for you last night, Miriam."

"What was it, Lizette?"

"Col. Bronson said you were exceedingly well preserved."

Clerical Advice.—A rather plain lady asks the opinion of her minister: "Is it a sin to feel a trifle of vanity when I am called handsome by a gentleman?" "Not a sin for you, my child, but a terrible responsibility hangs upon the gentleman."

Rev. Lyman Abbott says that "the women of to-day care not for their domestic duties as did their grandmothers." But they don't have to. Even Rev. Mrs. Lyman Abbott don't have to. Rev. Mr. Abbott's grandfather worked 50 cents per day, slept on straw, lived on pork and corn, and wore homespun. His grandson doesn't seem to be following in that line.

Strong drink being the chief and most profitable article on board most of the steamers that visit the coast of Africa it is worthy of note that one firm, Yates & Portefield of New York city, never carry any liquor in their vessels.

How Women Should Sit.

Ladies Home Journal.

Women who sit with their legs crossed to sever or to hold the baby, are not aware that they are inviting serious physical ailments; but it is so nevertheless. When a man crosses his leg he places the ankle of one across the knee of the other, and rests it lightly there. A woman, more modest and restricted in her movements, rests the entire weight of one limb on the upper part of the other, and this pressure upon the sensitive nerves and cords, if indulged in for continued lengths of time, as it is often done by ladies who sew or embroider, will produce disease. Sciatica, neuralgia and other serious troubles frequently result from this simple cause. The muscles and nerves in the upper portion of a woman's legs are extremely sensitive, and much of her whole physical structure can become deranged if they are overtaxed in the manner referred to.

The honey crop of San Bernardino county for the season of 1889 is placed

at 370,000 pounds. The total number of hives of bees is set down at 8,000.

POULTRY.

The Most Profitable Poultry for the Farmer.

P. H. Jacobs, in Farm and Fireside.

The best fowl for the farmer would be, as with horses, a general-purpose one, as most farmers do not breed poultry for show purposes, or keep incubators or brooders for early hatching.

I have had some experience in raising poultry, and now have Plymouth Rocks, Langshans, Light Brahmas and White and Brown Leghorns, and have tried several other varieties. I have found all to have some good points, but were I confined to one variety, I should take the Plymouth Rock as the most profitable fowl for the farmer to keep. For an all-purpose fowl, such as I think would suit a farmer, I am satisfied the Plymouth Rock will fill the bill the best of all. Where there are so many kinds, and all having their favorite breeds, or some particular breed they are accustomed to, it is rather a fine point to decide without being accused of self interest, or of having stock to dispose of. In this respect I can truly say I have no ax to grind.

The origin of the Plymouth Rock dates back a good many years. I think they were brought from Plymouth, and were bred from single-comb Dominiques, until they are now a dissented variety, although if imbred very often they will degenerate back to the original stock. Poultry fanciers, as a rule, find them a hard variety to breed true to feather. I would like to state, just here, a mistake most farmers are apt to make in using the same male bird from his own flock, or exchanging eggs or cocks from a neighbor; by doing this a few years a whole neighborhood will have the same stock. It will pay any farmer who raises fowls, no matter what variety, when he goes to some of the numerous fairs, to buy a good male bird from some exhibitor, even if he has to pay what may seem a high price. It will show on the young stock the next year, and do a great deal toward keeping the flock in a healthy condition, and breeders always have a surplus at that time of the year, and a good bird can be bought cheaper than in the spring.

DRIED FRUIT.

The Prospects are Good for a Large and Valuable Crop.

The dried fruit crop of Southern California promises to be truly Californian in its immensity this season. The freight agents are hunting shipments, as the different firms engaged in the business can now begin to estimate how much they will dry.

One company at Riverside is now curing one hundred and forty tons of fruit every day. Another dealer told a Herald reporter yesterday that he would ship of dried fruit this season, thirty car loads of prunes, fifteen of apricots and fifteen of peaches. There are a number of firms in the business, and innumerable persons who dry their own fruit. The output will be very large and valuable.

Lordsburg, Cal. July, 31st 1890.

Cool weather now!

Eld. S. H. Myers spent Wednesday at Esawen in company with Mr. C. M. Wells of Los Angeles.

Mr. Guy Woodward was a rusticator at Long Beach this week.

Mr. G. L. McDonough has rented the Dr. Nesbit house and will move into it this week.

Mr. F. A. Bronson spent some time at Artesia this week.

Bro. Spinger, when Solomon Eby, gets ready to leave Crawford County Kansas whats the matter with sending him to Lordsburg Cal., over the Santa Fe Route.—Ed.

W. L. Compton a realstate dealer of Los Angeles Cal., called on us this week. Mr. C. represents some fine land in the San Jacinta Valley including the Florida Tract which is very fine.

C. M. Wells of Los Angeles is spending today in this neighborhood with Eld. S. H. Myers of Virginia. The over amount of avoirdupois of Mr. M. causes Mr. W. to look like a hill-putan. However they seem to make a good team when working together.

Cook and Langley have shipped 150 tons of dried fruit. Some to Denver, Chicago, New York and other cities, which will average \$280 per ton, making the round sum of \$4200 worth of dried fruit out of one small town. How is that for Cal., Ha?

J. Milton Wine of Covina who has been spending some time at Highlands east of San Bernardino sloped with us Tuesday on his way home. Mr W. is looking much better than when he left for the mountains, he will also spend a month or two at the sea side.

T. A. Cord of Pomona called on us this week. Mr. C. is an architect and builder of no mean ability and is at this time putting up a fine residence building in the suburbs of Pomona in which he expects to live and be happy.

G. W. DeLong of Minn., has entered upon his duties as station agent at North Pomona for the Santa Fe Route. Mr. DeLong seems to think well of the country but thinks that his family must be here in order for him to enjoy it fully.

Some men get up themselves when they stumble and fall; others get up by being lifted by strong hands; and some never get up because they neither have strength to rise nor friends to help them.

WHEN last heard from M. M. Esheleman was on his way to Scandia, Burr Oak, Norton Kansas and Denver, Colorado in the interests of immigration to Southern California.

The continual day weather in the East is causing many practical farmers to look toward Southern California where irrigation keeps peace in the family and brings happiness to the mind. Let them come by the thousands.

ONE of the blessings that we have at Lordsburg not found in many places in Southern Cal., is shallow surface water. Mr. B. White has just completed a dug well. He got very fine water at 25 feet. His well is in the center of the town plat.

We trust that our patrons and friends will forgive us this week if things get a little mixed. As our typo, force has not been able for some time to be on duty and we have not been able to secure any help, but hope to be on time soon.

The "original package" bids fair to become a fixture in some states already boys may be heard in Kansas, when the train stops, crying: "hot cakes and pies in original packages." "Here are some fine peanuts in original packages." And then comes the girls singing, "hot coffee, sweet milk or fresh butter milk in original packages." And the dear, sweet little ones look as if they had been done up in "original packages."

Eld. S. H. Myers came in Saturday from Ventura county, where he has been visiting friends, for the past week. He reports a pleasant trip and well pleased with the fine land in the Conijo Valley. Eld. M. will spend this week here in the vicinity of Lordsburg, visiting and looking over our fine lands.

In answer to a telegram we visited G. R. Browning, of Ventura county who is now at the Sister's Hospital in Los Angeles. Suffering very much with a sore leg. There has been some talk that his leg would have to be taken off, but we are not in favor of the knife in this case and will protest it's use, as we have treated Mr. B. some years ago for the same disease and see no reason why he shall not come out walking on both legs.

William K. Whitesell who has been spending the past two years in Northern Texas reached this place last Monday Mr. W. has come with a view of making this place his future home. We were well acquainted with him down in the "old Dominion" some 10 years ago. He is a first class carpenter and will soon be prepared to commence business. Success to you.

Mrs. Peter Overholtzer, and Mrs. Royer, were callers at our office this week. we always appreciate calls made by our Covena friends.

B. D. Wells has moved into the Hotel Lordsburg this week, where he will take charge of the building. A big undertaking for a little man.

SOUTHERN CALIFORNIA RAILWAY CO.

Santa Fe Route.

H. A. VINCENT, AGENT

POMONA CAL., JULY 30th, 1890.

Mr. T. J. Nair, Lordsburg, Cal.,
DEAR SIR.

Arrangements are now being made to run a special Family Excursion, leaving North Pomona, via the Santa Fe Route, Thursday, September 4th, at 1:52 P. M., under the direction of Warner's Excursion, and personally conducted by myself, as I intend going to Chicago on that date. We already have a number of Pomona people booked for this date. I took this opportunity of advising you of this special excursion. Do you know of any one who can arrange to go with us on this date. I assure you nothing will be left undone to make the trip a pleasant one, and all that could be desired. Should any of your people desire to join this party please let me know, so we can arrange for berths and know about the number going. For any further information call on or address me in the Pomona Land and Water Company's office.

Yours Respectfully,

H. H. Vincent.

LORDSBURG HOTEL COMPANY.

Principal Place of Business Lordsburg, California.

Los Angeles, Cal., July 25, 1890.

Notice is hereby given, that at a meeting of the Board of Directors of this Company, held on the 24th day of July, 1890, an assessment of \$3.00 per share was levied upon the capital stock of the corporation, payable on 25th day of August, 1890, to J. W. Hugus, Treasure of said Company, at the office of Chas. Cassat Davis 12-13 Allen Block, Los Angeles City, County of Los Angeles, State of California. Any stock upon which this assessment shall remain unpaid on the 25th day of August, 1890 will be delinquent and advertised for sale, at public auction, and unless payment is made before, will be sold on the 13th day of September, 1890, to pay the delinquent assessment together with costs of advertising and expenses of sale.

Chas. C. Davis,

Secretary of said corporation.

For Sale.

3 Horses. Young & broke to work.
1 Span of mules.
1 Jersey heifer soon be fresh.
Will sell at private sale at my residence 4 miles west of Covina. Workman Ranch.

M. M. Overholtzer.

Sweets Pomona Items.

New stock men's clothing at Sweets.
Buy your fine and common hats at Sweets.
Dry goods and shoes cheap at Sweets.

MANY a man is ready to raise an objection who couldn't raise a cent.

Eld. Henry Frantz preached an acceptable sermon here last Sunday.

Elder S. H. Myers preached at East Riverside last Sunday. Elder Myers is an active worker in the christian cause.

We call special attention to a circular found in another column of this paper from H. H. Vincent of Pomona, Agent of the Santa Fe Ry. Who is making up an excursion party for parts east. Mr. V. will be in charge and we assure those who wish to join the party that every thing will be done to make the trip a pleasant one, as Mr. V. knows just how to do the business intrusted to his care.

The donor of those fine peaches will please accept thanks.

We are very much flattered with the success of our efforts in behalf of this paper, the subscription list has steadily increased and each week adds more new subscribers to the already large list. We have the people with us and sustaining our hands, and it buoys us to greater exertion. The very few small minds that flatter, flatter, squirm and squeal, are usually those that never subscribe and if they do, never pay for it, but often steal news and by sneak their policy read the papers of true subscribers before delivery, or in transit from the office.

La Verne Notes.

Mrs. Douglas and children arrived home Tuesday from Pasadena where they have spent a week with relatives and friends.

Mr. Freeman of Pasadena was in the village Wednesday looking after his interests here.

The San Dimas Water Co., are progressing well with their work. The Chinaman have completed the ditches and the pipe layers are now at work laying some two hundred feet per day. Anon.

C. Howe Pomona.

Dry goods, fancy goods, and notions.

Ladies, gents., and childrens underwear, and wool and cotton.

Special sales of sattoens, lawns and challies, now on.

Kid gloves very much reduced to make room for new styles.

A. N. HARRIS MANAGER.

W. H. Sanders and Mr Moles, of Pomona, made us a pleasant call this week Mr Moles, will visit Alessandro next week with an eye to business.

The main guy of our typo force has been confined to her room for the past week with a very sever boil on her arm, which has kept her from work, which is the result of our getting out the paper so late this week.

Out of communion with God, we can do nothing to please Him. The telegraph wires are cut, so to speak; and the work we do "for Him" is only random work—the fruit of self will, and is only so much wood, hay and stubble, to be burned up at the judgment seat of Christ.

INDUSTRIAL.

MOTTO.—The reward of industry is not alone in current coin, but also in an approved conscience.

The Reason.

(Citograph.)

We find the following in the Los Angeles Herald:

Ontario has set out 533½ acres to oranges during the past spring. Pomona has set out over 1000 acres, and Riverside has done as well. Redlands, it is claimed, takes the medal with 1300 or 1400 acres. At Rialto and other points near San Bernardino, the planting has been very heavy. The same is true of the Azusa valley and of the foothills from the San Dimas canyon to Cucamonga. It is a remarkable thing that all this activity all along the country everywhere east of the San Gabriel river; but when you cross that stream coming west, nearly everything seems to be paralyzed. What is the meaning of it all? The papers at Riverside and San Bernardino are full of advertisements of the advantages to be found by settlers. The east is flooded with pamphlets about Redlands and Beaumont. The Los Angeles papers are advertising lands sixty miles from here. But who ever read any announcement of any form of print about anything within twenty miles of Los Angeles? What is the matter? Are we all blind or paralyzed?

We would respectfully suggest that the meaning is that the region where the activity spoken of is the natural home of the orange and that people are finding it out. Land that will give an income of \$300 per acre yearly is dirt cheap at \$300 per acre even if unimproved. An orange orchard yielding a present income of \$300 per acre is almost given away at \$1200 an acre. Yet both are present selling figures. They will not remain so long.

Pine Apples.

Enterprise.

The Pineapple, or Ananas (*Ananas salivā*), a plant highly esteemed and much cultivated for its fruit, is experimented with quite extensively in this locality this season. It is a native of tropical America and is found wild in sandy districts of north-east South America. It does best in moist climate, and those who have them here, in order to have them bear fine fruit, must contrive some way of producing moisture and at the same time keep plenty of heat around the plants. But for ornamentals in large pots or tubs to be placed in the window or on the veranda they are very odd and unique. Among those who are raising them in Riverside are J. T. Jeavis, John Hall, James Mills and L. C. Cummins, also others who we hope will give us their experience at some future date.

What would we do without the State of California? First leading in the production of the golden dollar, she now gives us what is better still, her golden fruit, for which we gladly and eagerly return her the gold first sought within her borders.

California will during the coming year, supply fully two thirds of the

preserved, dried and canned fruits and raisins used in this country. The ripe cherries, pears, apricots and other varieties of fresh fruit supplied to the nation is enormous and cannot fail in keeping the Golden State in our memory as the most cherished of all climate from whence comes our most health-giving foods.—*St. Louis Magazine.*

About Prunes,

Pomona Progress.

The nurserymen throughout the State believe the next boom in fruit trees will be in prunes, and many of them are buying large quantities of prune trees in preparation for the next planting. We know of a Pomona man who has been employed for six weeks by a large nursery company in Sacramento in buying all the small prune trees he can at 15 or 18 cents each. He has paid out thus far the sum of \$27,000 for the trees, and is still quietly at work. It is argued that the demand in the East for California prunes will be enormous for the next four or five years anyhow, and that very large prices will be paid for the fruit. This, the nurserymen say, will cause a furor for prune trees before six months more are over. Some nurserymen think that the price of the trees will go to even thirty cents, and perhaps even higher because of the slow but sure gathering of the young trees into the hands of about a dozen of the larger and more wealthy nursery firms.

Home pathy for Chickens Etc.

Homeopathy Envoy.

Spongia will cure the roup in chickens almost every time.

Aconite, or if that fails euphrasia, will cure sore eyes in hens.

Ipecac is the principal remedy for diarrhea in fowls, or, if the trouble be known to be the result of faulty feeding, give arsenicum. Should these fail, resort to chamomilla.

In head distemper, when hens lose their bright looks, crouch about in corners and die readily one after another, close examination will show the skin around the anus to be colored a high red with black spots. This malady is contagious, and has a character similar to inflammation of the spleen. This plague is most observed during hot weather. Separate the sick and give them *nux vomica*, homeopathic form.

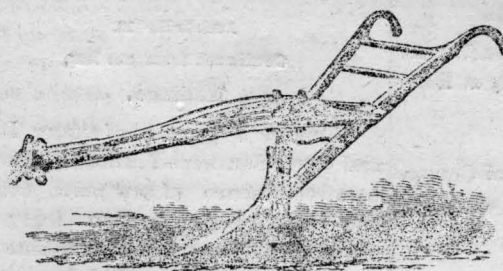

In white comb, the comb becomes slowly covered with a whitish dust, which seizes the wattle and then passes into the skin, of the neck, the feathers of which die off. Give sulphur for a day or two and then change to staphisagria, which is the main remedy.

In itch the body is covered with itchlike eruptions. Administer sulphur for three days, then follow with staphisagria.

For pip, feed on soft food and give spongia.

For gapes try spongia, and if it fails give *corallium rubrum*. The dose, twelve pellets of medicine in the drinking water.

He who knows his incapacity knows something.

EDUCATIONAL.

MOT: O.— Illuminate the mind, is to lay the foundation of sound government and human happiness.

The Maricopa County Beekeepers' Association shipped recently via the Santa Fe road to Chicago a carload of two hundred and thirty cases of extracted mesquite and alfalfa honey.—*Arizona Republican.*

A fine illustration of the growing popularity of women as public speakers is the fact two of the most important courses of lectures Chautauqua this season are to be given by women, while the address on the greatest of Chautauqua occasions, Recognition day, is to be delivered by Alice Freeman Palmer, former president of Wellesley College.

HOW TO TEACH.—Let all your truths have an edge. Be pithy, pointed and definite. Avoid blunt tools and speech, for they bruise and injure.

You sometimes have to drill an entrance for the truth. Steady, faithful drilling, with an occasional drop of the oil of kindness and love, will surely succeed.

Adapt your truth and words. Gimlet statements for the primary class, and auger principals for the older scholars.

Don't bore so big a hole as to fall in and forget your class. Bore, but do not be a bore.

Don't pound unless you are hitting something, and don't take a sledge hammer to drive a shingle nail.

Do not plane against the grain. Character is not smoothed by rough reproof.

Do not attempt too much at a time. Thin shavings make the smoothest finish.—*From The Teacher's Tool Chest by Silas Farmer.*

"Lead-poisoning among Jacquard weavers in a Swiss factory has been traced to dust from leaden weights used to carry the thread of the wrap".

"The fiber of the hop-vine—now used in France for paper—has great strength, light, flexibility and delicacy, and is claimed to be the best substitute for rags yet obtained.

"A thermometer valued at \$10,000—the finest in America—is among the instrumental resources of John Hopkins University. The graduations on the scale are so fine that a microscope is necessary for reading them."

"The proposed electric railway from St. Petersburg to Archangle will be of great scientific interest, if attempted. The distance is nearly 700 miles, and Archangel is almost under the Arctic circle—in latitude 63½ degrees.

A new substitute for sulphate of quinine has been found by M. Valude in the bark of the panpotano, a leguminous tree of Mexico. Either the alcoholic tincture or a preparing obtained by maceration has remarkable effect in fever cases

Curious changes in magnesium on heating with ammonia have been noted by M. N. Varren. At a modern temperature the chemical properties of the metal became much modified, and at a red heat the silver color is gradually altered to that of gold.

A substance having all the essential qualities of silk has been made from

wild hemp by Nayemura Sakusaburo, of Hikone, Japan. The plant grows on moors and hillsides, and could be readily cultivated. The fibre is strong and glossy, and several silk factories are said to have found it to be in no way inferior to silk.

ANILINE DYES AS ANTISEPTICS.—In aniline dyes, Prof. Stilling, of Strasbourg, believes he has discovered antiseptics strong enough to kill bacteria in a concentration not injurious to the human body, and at the same time diffusive enough to spread over a wounded surface. In a man of seventy, whose left leg between the ankle and the knee was covered with ulcers which would not heal, suppurative micro-organisms were all destroyed in a few days, and the ulcers disappeared.

A FRENCH RAIL TESTER.—An electromechanical railtesting apparatus, called the "schiscophone," has been tried lately at Ermont, France. It consists of a microphone and telephone combined with a mechanical striker and an induction audiometer. The instrument is claimed to be a reliable indicator of faults in the metal, and in the experiments made a defect was invariably found on breaking rails at places indicated as defective.

An Electric target is made by an English company. When a bullet strikes the target, which is built up in sections, the baticular sections, hit is pushed against the spring of a lever, closing an electric circuit and causing the section to be indicated on the registering apparatus at the firing end of the range. An electric bell is simultaneously rung.

The unique barometer improvised by a Belfast sea captain—and held him to be as accurate as the most expensive instrument—consists of a thin strip of white pine with a number of cross-pieces upon it. This is hung against the wall of a building, and the centre of the strip bulges out when damp weather is approaching and sinks in during dry weather.

No rich man was ever happy unless he used his money to make others so.

Behind each American citizen America is standing, and he knows it, and is the man that he is because he knows it.—*William Dsou Honels.*

An attempt to get some idea of the area over which a flash of lightning is visible is to be made, according to an announcement to the Berlin Meteorological Society, by means of simultaneous photographs taken at widely separated stations.

Everybody exclaims against ingratitude. Are there so many benefactors?

The father who does not train up his boys properly helps the barkeeper.

Be not immodest in urging your friend to disclose a secret.

The world's largest gold mine—for which \$16,000,000 has been refused—is stated to be in Alaska. It is lighted by electricity, and is worked day and night.

The real estate business is something of a lottery.

If we should leave out conversation scandal, gossip, commonplaces, fauity—what silence!

YOUTH'S HAPPY CORNER.

The Free Column.

If the young readers of this the "Happy Corner" wish to exchange books, toys, special pens, etc., they may advertise free on this page, by sending their names and addresses and naming the articles they have and those they wish. Notices must not exceed five lines.

It is the early babe that beats the alarm clock.

In music if the tones are not in harmony they will be offensive to the cultivated ear; so if children disgrace they will not please God.

THE devil selects his victims when they are idle: the savior chose his when they were busy—either casting their nets into the sea or while mending them.

"HAPPINESS is to the heart what sunlight is to the body, and he who shuts out either is an enemy to society."

"WHEN you retire to bed, think over what you have been doing during the day."

Helping the Minister.

"There was one thing that helped me very much while I preach today," said a minister once. "It was the quiet attention of a little girl who sat and looked at me all the time I talked, and seemed to try to understand what I said. She was a great help to me."

Think of that when father and mother take you to church, and see if you can't help the minister too.—Ex.

"Fool That I Am"

ONCE a farmer who had a piece of stony ground went on worrying and and fretting about it and telling how much labor it cost him. After while he got a good crop of grain, and a good price for it, then he said "Fool that I am," had I thought more of the harvest and less of the labor how much worry I could have saved myself." So it is in fretting about lessons, children.

Think more about the reward and the joys of knowledge and less about the hard lessons.

what was the use?

Did it hurt much, Willie, when the horse stepped on your foot?

Yep. Hurt like it was goin' to take the foot clear off.

And I suppose you cried hard?

Nobe. Wasn't anybody in sight to here me, and I wasn't going' to waste any bellerin' on an old horse.

It is stated on good authority that no devotee to tobacco ever graduated at the head of his class at Harvard. The officials in the United States Navy tell us that the first question asked a boy who would enter the naval school is, "do you use tobacco?" They usually answer no, and yet an examination of the fingers betrays the smoker, and a medical examination develops the truth that ninety-nine out of every hundred applicants use the weed in some form and are rejected because the nicotine poison has already affected the heart.

Good Company Or None.

"No company, or good company," was a motto given by a distinguished man to all his young friends. It was a motto he had always endeavored to follow, as far as lay in his power, and it was a very wise one.

Sir Thomas Fowell Buxton frequently referred to the great benefits he had derived from his visits to a particular family. Their words and example stimulated him to make the most of his power.

Speaking of his success at the university, he remarked, "I can ascribe it to nothing but my visits to this family, where I caught the infection of selfimprovement."

"He who has other grace without humility is like one who carries a box of precious ointment without a cover on a windy day."

WHAT a melancholy world this would be without children, and what an inhuman world without the aged! — Coleridge.

Fathers Take Brains.

By Pennyby Penby.

Once an old man was moving and he called a boy to help him. Among the things was an old trunk which was very heavy, and the curiosity of the boy moved him to ask what was in it, when the old gentleman answered, "Dead Men's Brains!" This only made the boy the more curious. So when the old man got to his new home he opened the trunk and told the boy to use the "dead man's brains."

Fathers, are you using dead men's brains for yourselves and your sons? Some of the best things ever known have been written by men now dead, and nearly every one can profit by using their brains.

Anybody can be nothing; and the market is overstocked now. Many are satisfied with their little stock of knowledge, others sit idly by while a third class go grumbling through the world without brains. They are always in the cellar among the rubbish, when by a little use of dead men's brains they might go to the third floor of intellectual greatness and instructive usefulness. One of the ways to be nothing and to have your sons be nothing is to have no ambition to climb up.

Your boys are getting on, or stopping, as you are doing. Though they work hard and are increasing your revenues and holdings they have access to the brains of neither living or dead men. They only know how, so far as you have informed them. Your limit is their limit. If you were to start them off on a new track, and they should succeed, about the third day they would look for a pat on the back, and if they do not get it they set it down as blunder number one, for every boy needs a pat when he does his work well.

But the "brain," get the books and read and have your boys read, study, think then think about what you thought; turn it over; look at it, trim off the rough sides; polish it, rub and sand paper your ideas until you get all the rust and dust off. Get brains!

You know when we were boys our fathers made us "do the milling" on horseback over the hills and down the "hollows" of the way-down East country. They would put a bushel of corn in one end of a three bushel sack and a big stone in the other, and then put the sack with the corn and stone on a horse and a boy on top of both and with a parental caution sends him off to mill. The stone was not to be ground with the corn but to balance it on the horse. One time the brains of a boy got to working and instead of putting a stone in the sack to balance the corn he simply put half of the corn in one end of the sack and the other half in the other end. The boy that did that got "yanked" for knowing more than his father, but the boy was ahead for all that! He had the brains—

LORDSBURG, CAL.

RED RICE'S.

LOS ANGELES, MONDAY, AUGUST 3RD—Red Rice's, with the bonny good fortune that follows the ever growing department stores, 143 and 145 S. Main st., gets there this week with some rare goods buys; among them is a splendid lot of overawing tin ware, ect, bought at a terrible sacrifice from H. M. Hughes of Pasadena. Two entire carloads of new goods added to these departments at Red Rice's besides the immense other good purchases made. We will quote for you a few prices assuring you that the entire consignment will be closed out to you at the same terrable discount, the goods could not be made for twice the money it is difficult to quote from among the thousands of articles gathered together at Red Rice's as we never offer special leaders, but all are leaders, all are below the mark of any other house probably in the United States. Our buyer says if you will duplicate the goods and prices at any other house in America he will eat the entire lot. We know he has a wonderful digestion for he is always hungry for more goods but hardly think it will be put to such a terrible test as the above suggestion might call for. Here are a few prices for you to digest; 4-quart buckets, 50 cents; dinner-pails, 10 cents; wash-boilers, \$1 gallon Demijohns, 25 cents; 1-gallon glass Oil cans, 40 cents; Coffee pots, 15 cents; Mincing-knives, 10 cents; dinner-plates, 5 cents; coffee-cutters, 5 cents; porcelain lined kettles, 75 cents; 18 iron Spiders, 10 cents; hotel plates, 50 cents per dozen; wash bowls, 5 cents; wash bowls and pitchers 65 cents; Side-plates, 50 cents per dozen; Cream-pitchers, 10 cents; decorated Lamps, 50 cents; Lamp Lamp-burners, 5 cents; Lamp-chimneys, 5 cents; nickel Rochester Lamps, 1.25; decorated Salts and Peppers, 5 to 15 cents; Night-lights 10 cents; tin matchsafes 5 cents; cut glass Syrup-jugs, 20 cents; common ones, 5 cents; white Sauce-dishes 5 cents; real china Cup-saunders 1.25; glass-sets, 50 cents; butterfly Matchsafes, 10 cents; glass Lamps, 10, 15 and 25 cents; decorated glass Mugs, 15 cents; yellow and brown ones two for 5 cents, glass cups, 10 cents; decorated Lamp-chimneys, 15 cents; Tea spoons, 10 cents per dozen; table-soons, 15 cents per dozen; Curry-combs, 15 cents; Skimmers, 5 cents; Dippers, 5 cents; electric Lanterns, 60 and 75 cents; yellow Pie-Plates, 5 cents; planished tin copper bottomed Tea and Coffee-pots, 50 cents; Chamber Pails, large size strongly made, 50 cents; express Wagons, 85 cents. Then in furniture we have thousands of dollars' all at prices only found at Red Rice's. In stoves we carry the largest stock in town. Our supply of m'nting still hobs out at 15 and 20 cents; per yard for good. We got a lot of second-hand carpets that are real good on Saturday, come and see our new revolving kitchen safe, it's a great thing and is cheap. Reader, you are wanted at Red Rice's and you will be glad, always glad that you found us after you call.
