KEEP AMERICA GREEN

PROTECTING our country's forests from fire is the patriotic duty of every good American— young or old. You can do your part by always being careful with fire in the woods and by cooperating with the Keep America Green program. This educational movement in the field of forest protection is encouraged nationally by American Forest Products Industries, a non-profit organization sponsored by the Nation's leading wood-using businesses. A continual supply of forest products through sound woodland management is a primary objective of the organization.
