RE: Glenwood Cemetery, Inc - Thelma May

Thelma called today to ask if she was being phased out. She said her materials supplier told her Otis had called to inquire about the cost of chemicals, what was involved, etc. She told me that she had gone to school 3 months to learn how to use the chemicals, that she worked on the grounds with a chemist after her schooling, and that it is easy to burn/pit/harm the stone if you don't know what you're doing.

I assured Thelma that so long as we can work together to keep the cost down, and so long as there are accounts with available funds, and so long as the stones/markers/etc. need cleaning There should be work available to her.
