Attached, in more or less chronological order, are worksheets not previously furnished to you. If the previous worksheets on Blocher and Dow should be revised to incorporate the power washings attached, please let me know.

The WCHT meets here on Sunday, and I know that Bernice will want information on the work in Washington Cemetery in advance of that meeting. I have "before" photos of the Moulds lot, but Mario began work on Stewart before I took any pictures. I will take "after" photos of both before Sunday's meeting.

The work on the Coyle lot is still in progress. Through yesterday, Mario has worked 18 hours, Ramon 8 hours, and Teofilo 10 hours, for a total of \$720. Equipment charges through yesterday are \$40.00 and materials are \$9.80. The total through yesterday is \$769.80.

I don't have information yet on the Westcott lot.
