From Thelma May
re. what she does.

Jan 25-82

Dear Miss Johnston.

I'm sending you the Lats you asked by Phone
you ask for. Thank you for the jobs.

you ask how long it would take to Clean the
allen lat. about $2\frac{1}{2}$ days an about the same on the
Autrey Lat. In other words about a week on each.
Let me explain some of what I do. Granite, marble,
Italian marble, Concrete, Bronze, & Brick, all take
a different Chemical. when the stone is Covered in
Fungus like these are, the Chemical softens it, then
I use brushes to scrub them. Then I Paint them
down again, wash down an scrub again till Clean.
an the allen lat the marble is black but will be
white when I'm tho. on my lids. I try to figure
how much material will be used, how much
scrubbing will have to be done, an how long it
will take me. I will take Pictures before & after.

I am looking forward to getting the list of lats
you said you had started on lats for me to bid
on. I Promise I will do them as cheap as I can but
do feel free to get other bids. Thanking you again.
