FEATURES

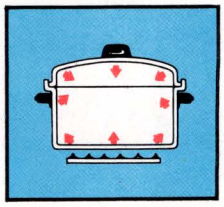

TRIPLE THICK
Above sketch illustrates the difference between Flavo-Seal aluminum cookware and ordinary aluminum cooking utensils.

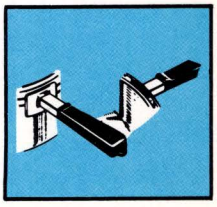

WIDER HEATING SURFACE
Flavo-Seal has an increased heating surface compared to the ordinary type of cookware. Wide flat bottom covers entire heating unit — no fuel is wasted.

FLAVO-SEAL COVER
New cover design forms metal-to-metal contact which seals in flavor and conducts even temperature throughout cover from sides of pan.

HIGH THERMAL EFFICIENCY
Triple-thick pure rolled sheet aluminum conducts heat quickly and evenly through bottom, sides and cover of pan. Saves fuel.

ELECTRICALLY WELDED HANDLES
Handle socket is smoothly and permanently welded to pan by electricity. Eliminates all rivets on inside surface — easy to clean. Molded plastic handles.

WATERLESS COOKING . . . what it is

Waterless cooking is a method of food preparation which cooks foods in their own natural juices and moisture, with little or no added water. In ordinary cooking methods, for example, vegetables are immersed in water during the cooking process. In waterless cooking — vegetables are cooked with little or no water at lower temperatures, thereby retaining more of the original minerals, vitamins, and nutrients.

Besides, vegetables retain their natural color, flavor and firmness, making them far more appetizing. Since the benefits of foods to the human body depend to some extent on how they are cooked and prepared, waterless cooking is now recognized by leading dietetic authorities as a superior cooking method from the standpoint of nutrition, flavor, taste, economy and convenience.

WATERLESS COOKING . . . what it means in actual savings

SAVES FUEL

Triple-thick aluminum requires only low heat to cook meats and vegetables. Heat is conducted quickly and evenly through bottom, sides and cover of each utensil.

SAVES FOOD

Food shrinkage is reduced to a minimum when using the waterless method of cooking. Inexpensive cuts of meat become tender and nourishing.

SAVES TIME AND ENERGY

Waterless cookware saves time — reaches cooking temperature fast — then cooks rapidly over low heat. Requires no watching while cooking. Gleaming aluminum is simple to clean, too.

SAVES ON REPLACEMENT COSTS

Ordinary utensils become worn and must be replaced frequently. Flavo-Seal cooking utensils, with a minimum of care, will last indefinitely.
