steadily growing for better service...

As a manufacturer of fine cookware and creative electric housewares, our goal is to help you satisfy more customers.

The coordinated efforts of market research specialists and skilled engineers create new products which make West Bend a trendsetter in the housewares industry. Inspection at each step in production and testing by the home service department is your assurance that every West Bend product is a reliable performer. Personal attention to consumer needs by the customer service department and its authorized service stations further assures you that West Bend is a company "...where craftsmen still care."

A 280,000 sq. ft. building, completed in 1970, is the company's third major addition in four years, bringing total plant facilities at West Bend to 1.5 million sq. ft.

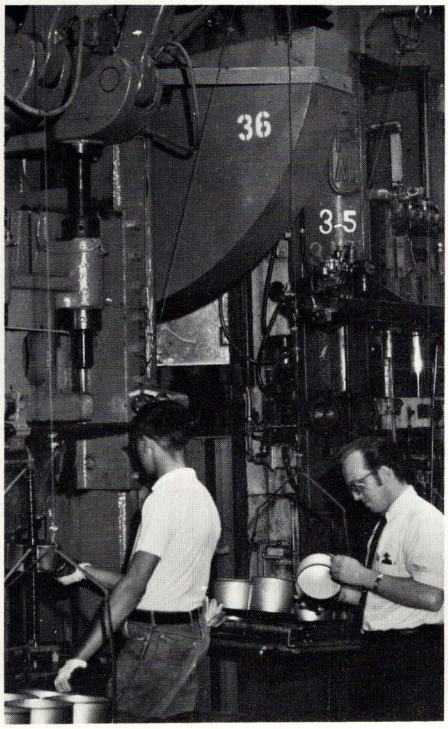

The 250,000 sq. ft. Distribution Center, with enclosed conveyor system, automated tow lines, indoor loading area for railroad cars and a fleet of 20 company-owned trucks, achieves efficiency unsurpassed in the industry. A network of forwarding points in Sheridan, Ark., Anoka, Minn., Rockfield, Wis., Barrie and Toronto, Ont., and warehouses in Trenton, N.J., Dallas, Los Angeles, Atlanta and Seattle, support the operation that services West Bend's customers throughout the nation.

Skilled engineers, using modern manufacturing technology, develop new products.

Detailed inspection at each step of production assures high, uniform quality.

Sixty mechanical, hydraulic and air presses shape stainless steel and aluminum.

Automated tow lines in the new Distribution Center have reduced order filling time by 50 percent.

New 42 foot high enclosed conveyor transfers finished goods to Distribution Center.

the flavor of far off exotic places

electric **ORIENTAL WOK**

West Bend's automatic wok puts one of the world's great cuisines at your fingertips. For authentic oriental cooking, heat is concentrated at the bottom. Foods cook in minutes, sealing in color, flavor and crispness. As they cook you push them up the spacious, sloping sides and add new ingredients. Pinpoint heat control assures exact temperatures. A beautiful server, too. Genuine porcelain on extra-thick aluminum resists stains and scratches. Topped with striking acrylic on aluminum cover. Fired-on No-Stick interior finish prevents sticking and cleans in a jiffy. Dishwasher-safe with heat control removed. Colorful 24-page recipe booklet provides all the tips needed to make you an expert in the fascinating art of oriental cookery!

6 qt. Electric Wok. Porcelain exterior on aluminum, 12 gauge pan; acrylic interior and exterior on aluminum, 16 gauge cover. Fired-on No-Stick pan interior. PORCELAIN-ON-STEEL COOKWARE

West Bend introduces superior performance in cookware that looks like fine china! Pans are finished in genuine porcelain—inside and out. Intricate morning-glory motif is a striking contrast to the pure white background. Co-ordinated covers have deep blue exteriors and white interiors. Porcelain is scratch and stain-resistant, fadeproof and completely dishwasher-safe. Beneath the porcelain is a heart of even-heating carbon steel. It absorbs heat smoothly and distributes it evenly across the cooking surface. Durable stainless steel protects the outer edges of pan and cover. Handles are molded of heat resistant phenolic. Handles feature stainless steel flame guards and holes for attractive hanging storage. (Matching tea kettle available.) Made in Spain for West Bend.

eliminates microscopic particles

Remarkably effective in removing airborne particles such as tobacco smoke, dust, industrial smoke, soot, many bacteria, pollen and mold spores. Traps 99% of all pollens in air passing through the unit, which may eliminate the cause of discomfort for many allergy victims. Collects invisible grime and grease droplets before they soil and stain walls, drapes and windows . . . reduces housecleaning and redecorating chores. More effective than ordinary mechanical filters because it's electronic.

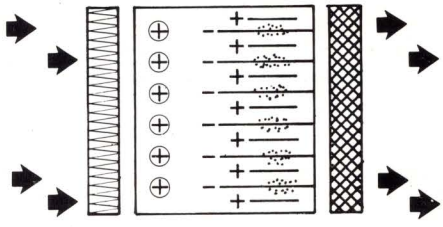

how Air Care™ operates

Room air is drawn by the fan into the air intake at the bottom (1) of the Air Cleaner. It passes through an aluminum mesh filter (2) which catches hair, lint and other large particles. Air then moves into the two-stage electronic cleaning cell (3-4) where microscopically small particles are electrically charged and caught. Cleansed air is then drawn through an activated charcoal filter (5) where odors are absorbed, and finally recirculated (6) through the front grill.

electronic cell and filter system

Wire mesh pre-filter (1) traps larger particles. Charging section (2) of the electronic filter electrically charges all dirt and pollen particles passing through it. The collecting section (3) consists of charged plates which work like magnets to attract the charged dirt particles. Finally, a charcoal after-filter (4) helps neutralize odors.
