Regal Ware for the Ultimate in BEAUTY and UTILITY

ALUMINUM
THE WONDER METAL

Aluminum is the most abundant of all the metals found in the earth. Consequently, there are small amounts of natural aluminum in practically all the raw foods we eat.

Aluminum is friendly to food — safeguards purity, flavor and natural food colors — and assures cleanliness and wholesomeness. It does not rust — can't impart a color or taste of its own. It is the ideal metal for kitchen utensils because it does everything well. There is no food, no cooking process for which aluminum equipment cannot be used. It is excellent for baking, frying, stewing or waterless cooking. It can be used to prepare foods on top of the stove or in the oven.

Recommended for HEALTHFUL COOKING

Aluminum utensils and equipment are used in leading hospitals and sanitariums, in hotels, restaurants, and in the finest of modern laboratories, canning and food packing plants. Leading health and food authorities recommend the use of aluminum ware for healthful and wholesome cooking.

★ Regal Ware is made of pure, cold-rolled sheet aluminum. Shaping of the utensils, called "drawing," is done by the use of tremendous pressure in giant presses. No heat is required. By this process, the aluminum becomes extremely hard and dense; it is uniform in thickness; and has a smooth, flawless surface.

★ BUILT TO LAST. Aluminum does not chip or break. Quality Regal utensils are so strong and durable that, given reasonable care, they last for years and years.

★ EASY TO HANDLE. Aluminum is not only durable, but light — a property which makes the utensils easy to lift and handle.

★ HEATS FAST. Aluminum conducts heat approximately three times faster than other commonly used materials. This makes possible worthwhile savings in time and fuel.

★ HEATS EVENLY. In cooking in an aluminum utensil, the heat spreads rapidly from the bottom, up the sides and to the cover. This prevents "hot spots" that scorch or burn food; the foods are cooked thoroughly on all sides; cooking temperatures are easier to control; and less heat is required for cooking.

★ EASY TO CLEAN. It is easy to keep aluminum ware bright and clean.

★ BEAUTIFUL. The smart, modern design of Regal utensils with their sleek, silverlike finish makes them a thing of beauty — an attractive addition to any kitchen.

A Complete Line of *Matched Utensils* for Every Cooking Need

A beautiful matched set of Regal Waterless Cookware — designed especially for use with an electric or gas range. This set is typical of the many practical combinations that can be made from the wide variety of Regal items described in this catalog.

Smartly styled handles and knobs. Handles are strong and comfortable. Knobs are large and easy to grip.

WATERLESS COOKWARE BY *Regal*

Waterless cooking is the modern method of preparing foods by using little or no water and cooking over low heat on top of the range. Only enough water to insure steaming the foods is necessary. Food and health authorities recommend this method for retaining the healthful minerals and vitamins in the food and preserving natural colors and taste. Waterless cooking is more effectively and efficiently accomplished in utensils especially designed for that purpose. Regal Waterless Cookware is engineered to meet each and every such requirement — and these features make it perfect for waterless cooking:

- ★ Regal Waterless Cookware is made of pure, sheet aluminum — one of the best conductors of heat known to man.
- ★ It is extra, extra thick to prevent burning or scorching.
- ★ Bottoms are flat to fit snugly and firmly over the heating unit and diffuse the heat quickly and evenly.
- ★ Straight sides carry the heat quickly and evenly from the bottom up and around the food being cooked. Sun-ray interior reflects the heat into the food.
- ★ Covers fit snugly to seal in the food moisture and flavor and conduct the heat over the food so that it is cooked on top.
- ★ Sleek, smartly-styled handles and cover knobs are heat-resistant and durably made of the finest bakelite obtainable.

These Matched Regal Utensils are designed for Waterless Cooking:

A Few Facts About "WATERLESS" COOKING

HOW IT IS DONE

The Regal Waterless Cookware features described above combine to cook the foods by what is known as Regal's "Wrap-Around Cooking." It is as though the food were wrapped in a package which cooked it on the bottom, on all sides, and on the top — all at the same time. It is very simple to do and the procedure for cooking most foods is as follows:

1. Put the food in the utensil and cover it. Place on MEDIUM HEAT.

2. When it starts to steam (in about 3 minutes) turn to LOW HEAT and cook until done.

ADVANTAGES

- Waterless Cooking helps to retain the precious minerals and vitamins contained in food. These elements are necessary for energy and a strong, healthy body.
- Foods look better and taste better because waterless cooking preserves natural colors and flavors.
- It effects savings in fuel because only low heat is needed for cooking.
- It saves on meat and grocery bills because less food is lost through shrinkage and cheaper cuts of meat become tasty and tender when cooked the waterless way.
- It saves time because it eliminates "pot watching." The foods won't scorch or burn.
