## The newest and safest tree stand made

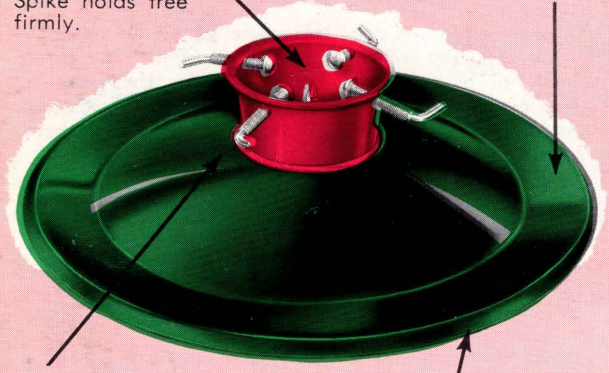

**REMOVABLE CENTER CUP**
Simplifies Setting Up Tree

Cup lifts from base to fasten tree trunk. A tap of a hammer fastens tree securely to center spike. Adjust screws, set cup back in socket of base for final adjustment . . . and fill with water.

Large cup constructed of 1/8 in. thick sheet steel provides ample water capacity. Spike holds tree firmly.

Contact area 46% of base area . . . avoids pressure marks on rugs . . . assures stability on uneven floors.

3/8 in. diameter adjusting screws with 3/4 in. diameter mushroom heads that will not imbed into tree trunk . . . assures easy, permanent adjustment.

100% stability over 360° outer edge. Tree can be used to fullest height because trunk sets within 1 inch of foor.

Won't tip! Won't tilt! You can't find a safer, easier-to-use tree stand. "STABL'S" unique, anchor-like holding power prevents danger of tree tipping by children or pets . . . eliminates danger of fire caused by torn short-circuited wires. Won't tip while you trim it (broken ornaments from tipping just once are usually worth more than the cost of the stand). The smooth-edged base can be turned on the carpet to simplify stringing lights or hanging ornaments. The disc-like base conforms to uneven floors . . . eliminates chance for wobble . . . won't leave pressure marks or mar rugs and carpeting. Stands are sturdily made of steel enameled in attractive Christmas red and green.
