MICROWAVE COOKWARE

A NEW WAVE OF COOKING CONVENIENCE

Imperial® Microwave Cookware is constructed from a unique glass-filled polyester. This material allows 95 to 97% of the microwave energy to be transmitted directly to the food. It can also be used in convection or conventional gas and electric ovens to 410° F. It resists staining, won't get soft or melt in any oven and goes from freezer or refrigerator directly to the oven without cracking, chipping or breaking.

The exacting design which went into the development of this cookware means optimum service to the user. All cookware products are dishwasher safe. Rounded corners, raised bases, deep-ribbed grills, well placed handles and pouring lips are appropriately included features that achieve maximum consumer satisfaction. The turntable is designed to eliminate time-consuming hand rotating of foods as they cook.
