BRADLEY GAMES

ADULT GAMES

The Far East contributes two of the World's most fascinating games

I-GO

(Pronounced "ee-go")

No. 4497

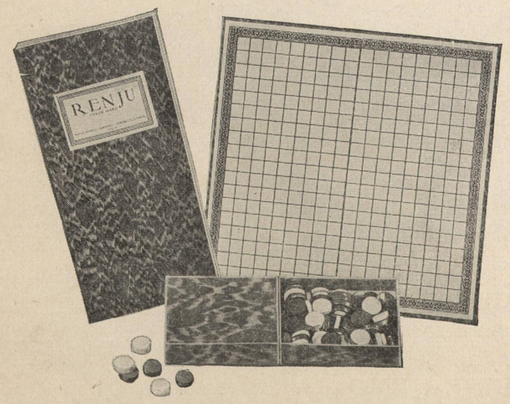

Master of games of skill is I-GO . . . a game of military strategy to gladden the heart of the scientific player. Not a single element of chance enters into its playing. Every move is actuated by the player's judgment, and every situation is deliberately created by one player or the other.

I-GO is played on a folding board, with an all-over design of small squares . . . and implements consisting of 180 men of each color, . . Black and White. The object of the game is to obtain vacant territory, surrounded in such a manner that it is safe against attack. The battle between the players is based on the capture of each other's men. Thus, I-GO is a game of war or conquest . . . and it taxes the ingenuity of the most sagacious self-appointed Generals who indulge in its play.

I-GO is the National Game of Japan, the favorite recreation of the educated Japanese. It is fascinating with the charm of the Orient. The implements are attractive and the Book of Rules, compiled by Aage Slomann, the leading exponent of I-GO in this country, explains the game in detail.

Size, 8¾ x 17¼.

One in a package. **Price, $7.50**

RENJU

TRADE MARK

A Japanese Game of Skill

Intricate enough to test the wits of the cleverest players, yet sufficiently simple to appeal at once to the novice. Played on a folding board with squared design playing field, and one hundred men. A "moving" game . . . of the checker and chess scheme of play . . . each move governed by the player's judgment, with no element of chance. One player is "Black", the other "White". "Black" always plays first, and to offset this advantage, special privileges are awarded to "White" which complicate the play and add zest to the game.

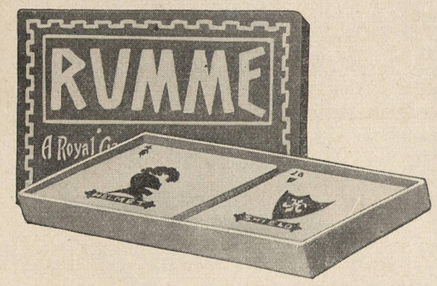

RENJU is especially popular in London Clubs, and has also met with favor in Germany. It "catches on" wherever tried, and is destined to be one of the widely played adult games of this country. Made in two attractive editions:—

No. 4479—VALUES
The Money Management Game

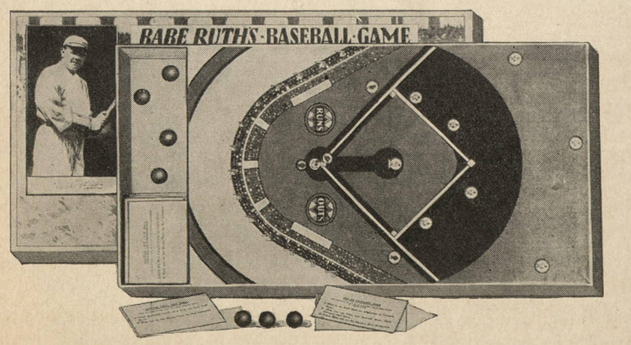

Of all purposeful games, VALUES is the most interesting and the most practical for teaching the rudiments of successful living. It is a fascinating game, embodying features never before introduced in board games. But it is more than an ordinary game, for it helps to develop a discriminating sense of values, and makes vivid the interweaving of money management and successful life management. It is a part of the famous Barnard Money Management Method which has reduced the use of money by individuals and families to a science.

Values is played by two, three or four players, on an ingeniously designed and handsome board. Each player has four counters, . . . representing ***Carefulness, Concentration, Courage*** and ***Courtesy*** . . . which start the game on entering steps termed ***Time, Work, Earn, Management.*** They travel on the Lanes of ***Wishes, Needs, Give*** and ***Save*** toward the ***Happiness Zone*** of Success. All the elements of financial life are symbolized by situations of play or details of the board design. As a board game of substantial value and worth while suggestion, ***Values*** is without an equal.

Size of board, 19 x 19 inches.

UNCLE WIGGILY AIRPLANE GAME

Always up-to-date, Uncle Wiggily becomes air minded and having heard over the radio that the airplane is faster than the wheelbarrow, he bought himself a plane to fly in the clouds and carry his carrots to market. In this new game we find a playing board representing the country over which Uncle Wiggily flies on his way to market. But he has as many adventures in the air as he did when hopping through the woods—storms, water spouts and tail spins make his fur stand up from terror, and once he has had to jump in a parachute.

The moves are made by drawing cards—105 of them, telling the player how many miles to hop Uncle Wiggily through the air—and there are 35 additional red cards which may move Uncle Wiggily ahead or delay him a bit, according to how his luck breaks. Spaces on the Uncle Wiggily air path contain letters which when separated into words form a funny little verse.

Playing boards and box labels lithographed.
