FLAXSEED SYRUP—This excellent remedy for a cough is made thus:—Boil one ounce of flaxseed in a quart of water for half an hour; strain, and add to the liquid the juice of two lemons, and half a pound of rock-candy. If the cough is accompanied by weakness and want of appetite, add half an ounce of powdered gum-arabic. Let this simmer slowly for half an hour, stirring it occasionally. Take a wine-glassful whenever the cough is troublesome. This syrup has proved the most efficacious of cough syrups in the experience of ourselves and many friends. It has even given relief to consumptive patients, alleviating the soreness of the chest, and strengthening the stomach and lungs. We have known a quart of it to be taken in the course of twenty-four hours with good effect, care being taken to avoid draughts, &c.—[Household Journal.

WHIPPED ICE CREAM—To one quart of milk add three teaspoonfuls of flour, stir it very smooth, and boil it over a slow fire till it is cooked. Set away to cool, then sweeten quite sweet, and flavor to your taste. To every quart, add three pints or two quarts of thick cream. (Sweet cream of course.) Whip the cream and mix it in. Judge by the taste whether it is flavored and sweetened enough; if not, add more, stirring it thoroughly, and then freeze.

PHILADELPHIA ICE CREAM—Two quarts of sweet milk; three spoonfuls of arrow root; whites of eight eggs, well beaten; one pound of loaf sugar. Boil the milk, thicken with the arrow root, and pour the whole on the eggs. Flavor and freeze.

The rule for freezing it is to use one-third salt and two-thirds ice, chopped fine.

[Rural New Yorker.

COOKING APPLES—Mrs. F. D. Gage, in the Ohio Farmer, thus writes:—One of the most notable housewives and best cooks in the State, has a new way of cooking apples, at least it was new to me, and will no doubt be new to many others. She pares the apples, and quarters them, placing them in a tin plate with the core side up; if dried apples, a little water is added; they are then set in the oven, which is always hot at meal time, and roasted; when done, they are slid on a common plate, and sprinkled with sugar, to be eaten warm, with bread and butter and cakes. It would require canned fruit of extra flavor, to tempt me from the apple-dish, if thus prepared. Strawberries or half-ripe peaches are not to be talked of in the same day.

TO STOP BLEEDING—Asa Kemper writes to the American Agriculturist, that bleeding from a wound on man or beast, may be stopped by a mixture of wheat flour and common salt, in equal parts, bound on with a cloth. If the bleeding be profuse, use a large quantity, say one to three pints. It may be left on for five or six days, if necessary. In this case of a horse which was bleeding from the nose, the bleeding was stopped by the use of this mixture. It is a very good remedy for a horse which is bleeding from the nose.

DELICATE PIE—The grated rind and juice of 3 eggs; 2 tablespoonfuls of sugar; the yolks of 3 eggs; 2 tablespoonfuls of flour; 3 of a cup of water. Take the whites of the eggs, and 3 tablespoonfuls of sugar; beat to a froth, and turn it over the pie when baked. Set it in the oven again, and let it remain 3 minutes. Use but one crust.
