

Jan 21, 14

Dear Gene + Jane

Thanks for your card
I hope you + family + friends have a happy
1974 too

The weather was not so good yesterday
so I did not expect you.
Today it is very nice but you wage slaves
have to be on the job.

next week end it may be better again so
I decided to send you the scribbling I wrote
for your friend quite some time ago.

You + Gene + Jane have strong social contacts
with her. Which means you both may be thinking
about her quite often during the next few years
specially about Venus matters.

Dore, I'll speak to Jane while she has the
tape going. She can always have Nixon if she
should want an 18½ inch (or is it minutes) erased
Nixon from E Saturn strongly affecting his planets
again till about May (I believe) bringing more
worry

my Progressed Sun to Mercury affliction will be at its
Peak first Part of next month. Which is not so good
for talking now, so it is better if we postpone a while
it also is causing me other Calamities.
a few weeks ago I fell into the river in the dark.
got soaked wet. and hurt my hip and
leg slightly. Then last Saturday (week ago)
I got the flu + fever + then my leg + hip
began to hurt me quite a great deal

Last Friday I went to Oceans (and got your card)
and thus made my hip and legs worse for a while
but I think I'll get over it slowly I had it
several years ago too.
That proves that living the Dainty life
is no guaranty against Calamities.

Am sitting in the Sun shine in front of my Castle
am sending you very nice vibration VIA ESP

Sorry I did not get to see Gene's father

Best wishes to you all.

Bert
