

Thompson Stitcher, No. 11

Uses both a flat and round wire on a flat and saddle table. The flat table stitches through the side of a book from one section to one-half of an inch in thickness. The saddle table stitches through the center of the fold from one sheet to one-fourth of an inch in thickness, and will stitch a sheet of thirty-six inches through its center. The length of the staple can be adjusted to any thickness without any waste of wire. One Driving Pulley, $9 \times 2\frac{1}{2}$ inches, should run at 120 revolutions per minute. Weight of Machine when crated, 400 lbs.

Price, - - - - - \$300.00.
