

September 4, 1974

Dear Chris:

There seems to be a discrepancy between the paper you want and what the paper people have to offer. Here is a copy of your letter and what they have to offer.

Fluorescent, white, laid cockle sub 20 does not come 28" X 34" in long grain but ~~XXXX~~ 34" X 22". So what shall I order?

Other things:

I have 25/3 cord, not Barbours but an irish fêrm , can you bring the 18/3 ? (we will repay)

What is difference between binding needles and medium sewing needle?

No cord tube. Think I told you this before.

Should we wait until you come to cut the paper or do it before. Hope you will make it on the 28th!!

End papers: Is this sutiable? if not send me a sample of what you will need and I'll try to get it in a local retail store. The bond is white while this is cream.

Will try to call you Sunday night for an answer to these questions

Getting bindry ready for the big day.
