

## Vellum

Vellum - veal - calf skin

Parchment - sheepskin

Foris - split sheepskin

skiver - outer portion of split sheep

Vellum is just raw hides, cleaned preserved, stretched + dried flat. any moisture applied to it will soften it, but in drying again it will contract to its original shape. ~~Better to line vellum with paper using paste as adhesive + softener~~ <sup>wrong</sup> Instead line the boards covering the edges + double lining inside + allow to dry thoroughly.
