Figure 1: Schematic representation of the experimental design. The figure shows a timeline of the experiment across 10 sessions. Session 1 includes a baseline (BL) and a 10-minute (10min) test. Sessions 2-4 are training sessions. Sessions 5-10 are test sessions. The timeline is divided into three main phases: Baseline (BL), Training (T), and Test (T). The training phase includes a 10-minute (10min) test at the end of each session. The test phase includes a 10-minute (10min) test at the end of each session. The timeline is represented by a horizontal bar with segments for each session and a vertical axis for time.
