PARALLEL PERFECT

1/2" & 1/4" WIDE MAKEREADY TAPE

Makeready is a necessary evil in steel rule die-cutting and cutting & creasing. It compensates for the plus/minus of the die and the press, the nature of the material being cut, the density of the die, etc., etc., etc. It is a well known fact that narrow width makeready tape is best suited for the cutting & creasing makeready operation.

Bar-Plate has available for immediate delivery, 1/2" and 1/4" wide gummed makeready tape, 500' rolls, in thickness of .0015", .003" and .006". The .0015" thickness is glassine and transparent. The .003" thickness is a white kraft and translucent. The .006" thickness is natural kraft with no translucency.
