

FORWARD

This unit teaches you about the operation of the Goss Metroliner Printing Units with Injector Ink System and related equipment. It is divided into eight main areas. These include:

- Techniques That Differ Between Offset and Letterpress Operation
- The Metroliner Unit
- The Metroliner Folder
- The Reel Room
- The Dampener System
- The Master Control Console
- Maintenance and Housekeeping
- Waste Reduction

The format of the Trainee's guide is designed for self study as well as group instruction. Each of the five lessons contains several learning modules. The margin is ample enough for the trainee to make notes while reading the text or adding additional comments during class sessions. Because each unit is designed to be a workbook, feel free to write-in questions and answers or make notes and sketches in the margin if you wish.

Each of the lessons in this program has been carefully planned to make your understanding of the Goss Metroliner Unit as easy as possible. However, to gain knowledge related to on the job performance, you must make a determined effort. The final responsibility for learning is on you. Remember you are competing only with yourself and directed study leads to good productivity in your work place!
