

# OWNERS REPORTS

BAIRD & PATTISON LTD.

25, Essex,  
N-8.

January, 1953.

Martin Brothers Ltd.,  
Toronto, Ont.

Gentlemen:

"In reference to our British  
Glockner Press which we installed a year ago,  
we use this fine press on all types of work,  
especially heavy color overage work and the  
best report we can give you is: we wouldn't  
want to be without it. We have several other  
machines and speed presses in our greenroom  
and from experience on all types of work,  
short and long runs, we can say with confidence  
the Glockner is the 'best machine we ever  
operated'."

Very truly,

BAIRD & PATTISON LTD.

"wouldn't  
want to be  
without it"

"Best machine  
we ever operated"

THE GLOCKNER is accessible and simple to operate. There are few adjustments. The cylinder may be comfortably reached for make-ready. The feed-board is quickly raised. The ink-duct adjustments are sensitive and readily made while the press is running. Feed and delivery piles, inking rollers and forme, are all in view and readily accessible.

The massive frame construction, rigid cylinder, large cylinder bearings, and heavily crossed-ribbed forme-bed assure rigid contact between forme and cylinder.

To-day, GLOCKNER Automatics are in great demand. The fine performance of THE GLOCKNER recommends it to large and small printers.

| Largest Paper size   |               | Smallest Paper size                       |             | Maximum printing surface |             |
