

Monday - off to Am Express to verify flight to Munich
then to Trienale. Not too exciting with a few exceptions
then Dina's for dinner, bought food & ate at

Teresina's. I was to have gone to Verona over
night but was too tired and so will go early
on Tuesday morn, just for the day.

Verona - A lovely city - I like it much
better than Firenze. Only an hour & a half
by train. Saw the Lago from train at one point
but as it was an overcast day decided not
to take the boat ride. So just wandered
around town. Has a lovely river -
and I had a noon day meal outdoors
under a grape vine.

Left in morning at 9:15 & returned on 3:30 train
Bought pastery for dinner at Dina's

Also each a bottle of cherries in liquor.
Amelia & Giannino come over late in evening &
walked me to Teresina.

All dresses washed & ironed.

Raining but could not change clothes as my two large
bags were at Adamis. So in cotton dress & sweater walked
to a taxi then to Via Tortona where Pierino was
waiting with 2 suitcases & off to Air Terminal &
Munich. Over cost but good flight & nice cold
lunch!

Took letter from Tony Cairns to Herr Butz - at the

Staatsbibliothek Institut für Buchrestaurierung

Herr Butz was away on vacation but a Herr
Fischer showed me around. Also a Fuchsin
Fischer + Herr Ziegler

Very interesting they use a tissue with an
adhesive + hot plate.

Annalen was a great help in interpreting

Leather is dyed using aniline dyes by Herr Ziegler

- Leather is first wet then spread on a plated
glass tray + the dye put on + then with
a smooth piece of plastic it is forced
into the pores of the leather by brushing
this pc of plastic back + forth + crosswise
then hung up to dry. When dry leather
dressing is rubbed into it to soften it.

- 2 Using hemp cut into tiny pcs. + mixed with
hot glue to form a mulch. This is good to
build up wooden corners or fill holes in
wooden boards. Using a metal form to
hold the mulch in place. When very
dry - 2 or 3 days - shave down
with knife + then smooth with sand paper.

In evening Beve took us to dinner at Ayina
Annalen works wore her dirndl

Raining when we returned.

It's very nice to see people wearing their
national costume as an everyday occurrence.

Wrote to Tony that they have not received paper
nor solvable material

7/25/26

Went to ^{National} Hairdresser this morning then to ~~State~~ Museum
on Prinzregenten Str. A lot of very old art - well
displayed, religious, furniture, clothing, Armes,
whole rooms (walls & ceilings painted) of wood.

In afternoon Annalen took me to an old Baroque
church "Asamkirche" then shopping for bone
spoons for Bobby's birthday but we couldn't find
them so will write to Trude for some. Bought
food then to Stadt Museum - furniture from
17th to 19th century. Whole rooms. Overcast
all day.

Home to rest a bit. To-morrow we go to Tutzing
to meet Father & Mother Reich.

7/26/27

Sat. morning, breakfast late. Biri tired. Annalen went off to hair dresser & Biri & I to Museum to see Gutenberg exhibit at Deutsches Museum then to flea market. Lots of traffic. Back home to Annalen for lunch then off to Tatzing. A lovely ride. Annalen drove her own car because if it rains, it might well do so as it is overcast, she will go to a class reunion in afternoon. So Biri & I drove there in his car. What a beautiful place The Elder Reich home, right on the lake lawn sloping down. We had coffee on the terrace half way to water's edge. Marion Frig. Come later. The Biri took me for a motor boat ride on the lake. Lovely. So quiet & serene. The house is darling Papa Reich use to collect pictures & has it all over the house. A beautiful green tile stove in corner of room (no longer used.)

Upper bedrooms with bed under eaves & curtain - just like a dolls house. I had a room downstairs with painted furniture - Just lovely.

How wonderful it must have been at Christmas time when I to was there last year.

In evening a young couple came in & we watched his brother in the Olympic boat races in Mexico. He had been Biri's Cuban man in race in Tokyo at Olympic where they won in their class.

All together a nice evening drinking a Bavarian wine.

Annalen drove me to airport - plane a hour late - I finally convinced her to leave me - not wait for the departure. She reluctantly did.

On way out of Tatzing we met his grand father - Nice courtly old gentleman who kissed my hand.

Paris looks ugly after Munich & Tatzing!
Hotel Royal Portique grubbin there ever.

For case type of binding used on Value 5 the boards fit flush into the joint of the backing. This provides greater strength for library books.

With split boards & groove this strain is taken by the tapes & backbone. Joint of backing equals the thickness of board.

Split-board end paper

after applying mull, glue the tapes to the waste sheet. Glue out half the waste sheet and fold over to the beginning of the angle of backing. Trim off excess, leaving a tongue of about $2\frac{1}{2}$ cm. Cut tongue $2\frac{1}{2}$ cm from head & tail.

There are two ways of binding books with split-boards

- 1 by attaching the boards to the book before covering
- 2 by making a split board case & inserting into the split as the casing-in is done.

To attach the boards to the book before covering: open the split and apply glue to the board. Close the split & reopen immediately to spread sufficient glue on both boards. Place the tongue in the split board. Correct and equal the squares, insert tins & press.

For split casing. After cutting the boards to the size of the book, put an additional line of glue 2 cm wide at the head & tail of the split opening.
