King James Cast Coat

The smooth, mirror-like surface of King James Cast Coat adds quality and appeal to every printed communication. Available in both cover and boxboard, it offers the ultimate in sharp, clear reproduction of photography, art, and typography by offset lithography, letterpress, and gravure printing.

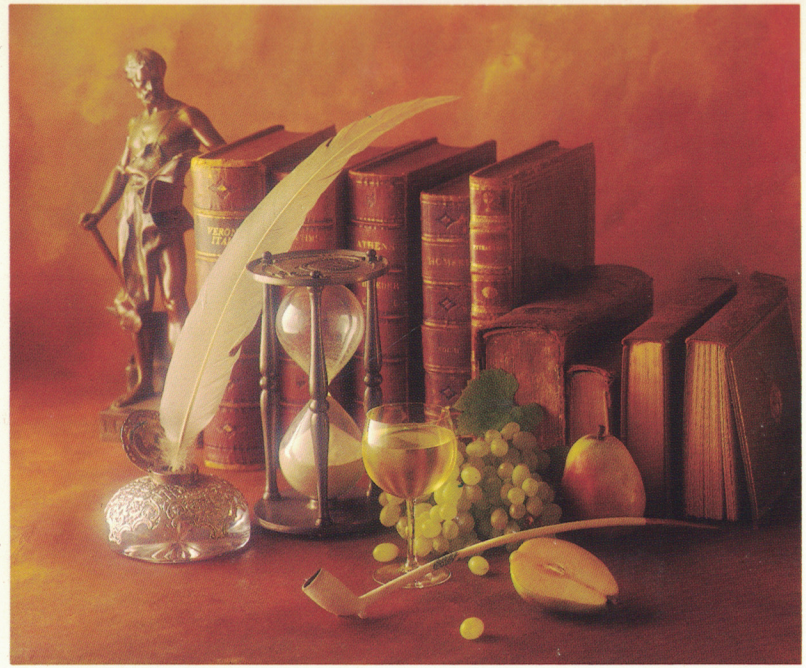

Due to its superior strength and resilience, King James Cast Coat is ideal for finishing techniques: blind embossing and hot stamping are easily accomplished with great attention to every detail. Die-cutting, scoring and folding can be achieved cleanly and smoothly with remarkable resistance to surface fracture.

Specify KJCC with confidence for a wide range of projects, including brochures, folders, reports, cards, and packaging.
