■ THE GLOCKNER Automatic Cylinder is a popular press in printing offices all over the world because it is sturdy, reliable, fast and modern in design and performance. Its maximum speed is 4,000 impressions per hour. All kinds of stock from manifold to four-sheet board are handled equally well. This folder was printed on THE GLOCKNER at commercial speeds. It is suitable for all kinds of work, from jobbing to art.

THE GLOCKNER combines press, feeder, and delivery in one unit. Its outstanding feature is simplicity. There are no wheels, rollers, pulleys, or tapes to adjust, to mark sheets or disturb register.

Simple positive suction arms carry the sheets from pile to front-lays, and after printing, from the impression cylinder to the delivery table. This ensures quick changes, accurate feeding, steady operation.
