

## The Red River and Gulf RR and the tram

**The Red River and Gulf was completed between Long Leaf and Lecompte in December, 1905, and the following February, operations were begun by the company.**

**RR&G #1 was the only engine on the line, and pulled a freight train, with a passenger carrying caboose, first between Long Leaf and Lecompte, but very soon, RR&G service was extended to Ashmore.**

**Red River and Gulf #1, built again by Lima, in May, 1905, shop number 1009.  
It was used to build the railroad and then it hauled RR&G trains until about 1915.**
