S264B

S264A
See the point.

Thickness through hub $4\frac{1}{4}$ inches.

S255B, Cast steel housing and sheave similar to *S193B*, except with deep throat and $\frac{45}{8}$ inches thick through hub, providing extra long bearing. Steel swivel eye. Bronze bushing.

S193C, *S146C*, Steel snatch blocks with shackle. Hollow self lubricating sheaves and hollow pins with compression grease cups. Bronze bushing.

S193AB, Steel skidding block with hollow self lubricating sheave. Having solid eye for attaching to trolley carriage with shackle for skidding line. Bronze bushing.

S264B, Snatch block for out-hand cable. Steel shackle, malleable iron housing, semi-steel sheave with chilled rim, and compression grease cup for lubrication. Bronze bushing.

S264A, Same as *S264B* except shackle extended to form a bracket to support block in a horizontal position when attached to tree or stump.

S317B, *S400B*, *S430B*, Snatch block for outhand cable. Cast steel housing with safety shackle, and manganese steel sheave. Compression grease cup lubrication. Bronze bushing.
