

January 1914 W. R. Mattoon Forest Examiner,  
U. S. Forest Service made a careful study of Forest  
conditions in Urania Forest with recommendations.

July 1914 Mr. Kopman of Louisiana Conservation  
Commission made a report on forest bird and game conditions.

January 1915 S. T. Dana of U. S. Forest Service  
laid out four Long Leaf Plots, known as Roberts C-1-2-3-4  
two fenced and two unfenced.

May 1, 1916 W. R. Mattoon again viewed these plots.

Since then the plots have been visited by foremost  
foresters from all over the world and thousands of forest  
lovers and students. The U. S. Forest Service has a complete  
record of these plots year by year. H. H. Chapman,  
Professor R. C. Bryant and Yale's Classes have studied these  
plots since 1917.
