

PRICE LIST of REPAIRS OF IDEAL GRINDER

REVISED PRICES EFFECTIVE JAN. 1, 1923.

Subject to Change Without Notice

In ordering repairs, be sure to give number of the Grinder. Grinders numbered 4553 and under, are 1909 and 1910 models, with main frames numbered H-1 and H-2. When ordering repairs for these Grinders, use the prefix letter H instead of J.

In order to distinguish between the two models, we have changed the prefix letter, but not the number. Many of the parts of the two models are not interchangeable, therefore be careful to give the correct number of the Grinder, and use the proper prefix letter H or J before each part number.

The J-4x & J-4½ arm casting is made in two parts, and will fit all Grinders numbered 4554 and above. This arm cannot be used in place of the H-4 arm.

Be sure to send cash with order, as we will not open accounts for repairs. Otherwise will ship C. O. D.

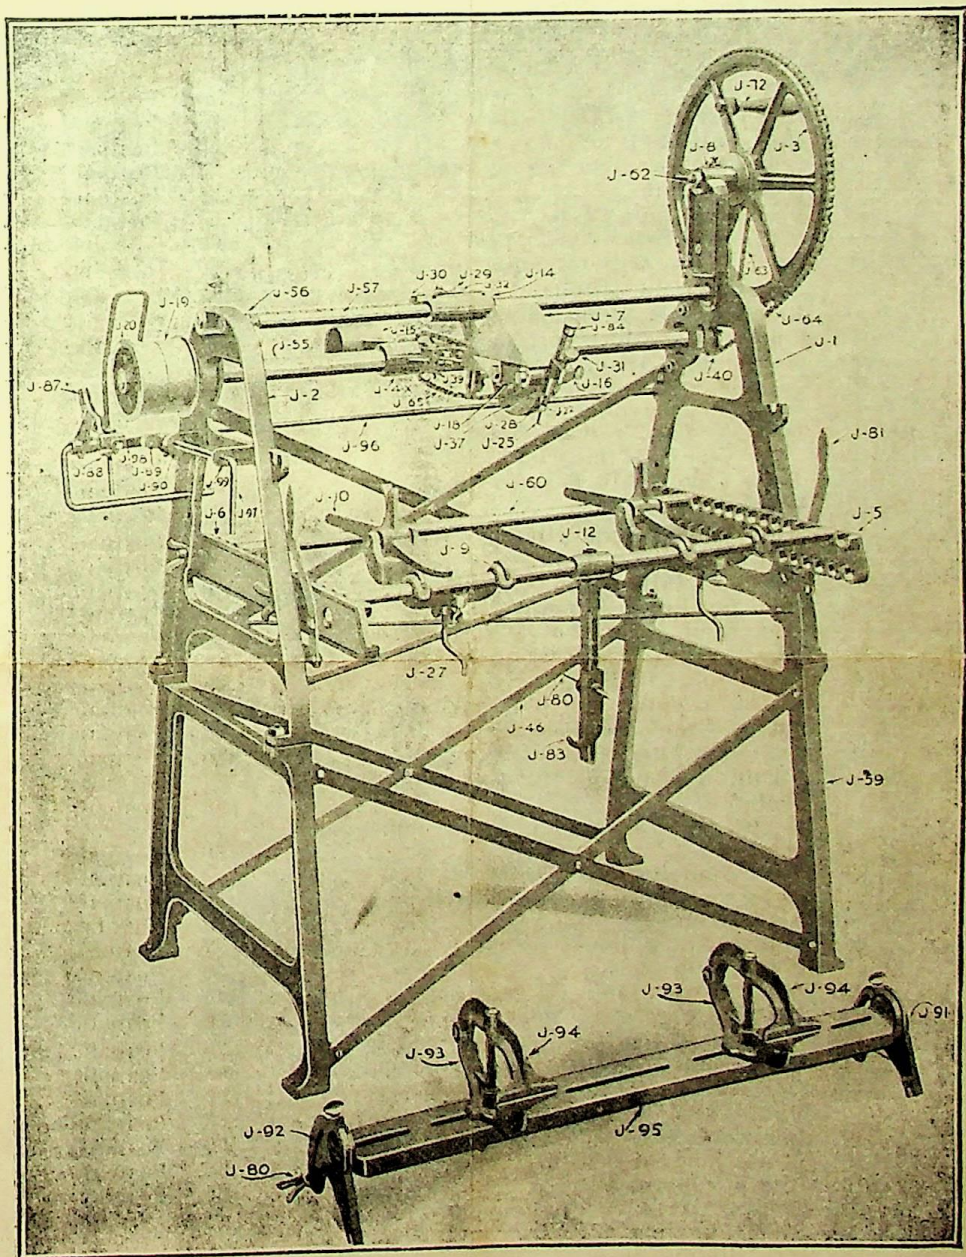

Do not fail to add sufficient postage when parts are ordered sent by parcel post. If too much is sent, balance will be promptly refunded.

Parts returned to be rebabbitted must be prepaid.

The Fate-Roo-Heath Co.

Plymouth, Ohio
