## But Why Minwax?

With Minwax you completely avoid the shallow, artificial look. Wood Finishes and Americolor Finishes penetrate to become an integral part of the wood, preventing scratches from exposing raw wood. Antique Oil, Finishing Waxes and Polyurethane Finishes give you a choice of protective surfaces with appearances ranging from satin-softness to high gloss.

With Minwax your wood achieves its fullness of depth, warmth and brilliance. With minimum effort on your part.

At Minwax we work to help you do nice things with wood. Easily. It's been that way since the turn of the century. That's why Minwax is the finish people prefer.

Minwax is prepared with you in mind.
