JOHN FITZ
MANAGER

Hanover, Pa., U.S.A.

January 13, 1922.

Mr. O. E. Collins,
Anselma, Pennsylvania.

Dear Sir:

Replying to your favor of the 11th inst., the following are the specifications of the internal segment and pinion described in our letter of January 10.

Internal Segment Gear, Patter #245B; 12'
0-1/4" pitch diameter; 224 teeth, 5" face;
made in eight sections.

Spur Pinion #215B; 18.1" pitch diameter by
5 1/4" face, with 28 teeth; 2-1/32" pitch, to
mesh in segment gear.

Both segment and pinion will be made of our semi-steel alloy. Hoping to hear from you at your earliest convenience regarding your decision in regard to this change, we remain

JSF:ML

Very truly yours,

FITZ WATER WHEEL COMPANY,

Per
