Recently there was a question concerning why the charter members were not marked in the membership book that was published in December. We meant no slight, it was merely to simplify the process. Delving into the Society archives recently we ran across a list of charter members and would be interested in confirming it.

To be a charter member a person or organization had to join the society during the period from May of 1986 to May of 1987.

Some of these people have died, some of moved away, and others, have gone on to other projects. There are a few that nobody can remember. It was certainly top heavy with Saugatuck residents.
